Silicon Drum Heater, 70" x 4", 1500 W

Product Overview

Silicone rubber laminated drum heaters are heavy duty, electrical resistance heaters in blanket form. They are designed to provide a practical efficient means of freeze protection, viscosity control, melting of solids and maintaining materials at elevated temperatures.

The Drum Heaters are totally integrated heating systems consisting of a durable, multi-strand nickel chromium heating element. They are insulated with two applications of high temperature fiberglass yarn which are knitted into tape form. The tapes are laminated between multiple layers of silicone impregnated fiberglass.

English

RS Article	Width (in)	Length (in)	Wattage (W)	Voltage (V ac)
9210026	4	60	1200	230
9210029	4	70	1500	230

Specifications

Width:	4 in
Length:	70 in
Voltage:	230 V ac
Wattage:	1500 W
Adjustable Thermostat:	50-300 °C
Lead Wires:	10 in
Lead Wire Insulation:	Teflon
