

# TECHNICAL SPECIFICATION

## Supermask RG8 Cross Filament Tape

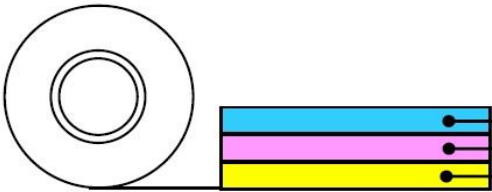

**Supermask RG8** Backed with PET film and reinforced with glass fiber. It's high strength bi-directional filament tape with high viscosity; suitable for bundling heavy objects and carton packing; general bundling; reinforced marine carton packaging; express-bag tear tape and so on.

### Performance Features

Supermask RG8 is a transparent and high strength bi-directional filament tape. Glass fiber contributes higher tensile strength and improved synthetic rubber delivers stronger adhesion; generating bi-directionally strengthened effect; high resistance to abrasion; impact resistance and high holding power.

### Storage Condition

It's recommended to store in clean and dry place. Damaged packaging shall be prevented. Not stored with volatile solvent. The temperature of storage shall be 4°C to 26°C and the humidity shall be between 40% and 50%. Rotate inventory recommended.

The above properties and results obtained refer to the average values of laboratory testing carried out on the samples of manufacturer product. Manufacturer does not guarantee testing accuracy and makes no guarantee of product performance, safety, or suitability, either expressed or implied, when used alone or in combination with other products. Manufacturer strongly urges users to undertake independent testing in order to verify the suitability of the product for whatever intended use. Manufacturer assumes no responsibility for any damage or injury sustained as a result of the use of its products.
