About Company

***Wasted, Water Treatment, Mechanical
Engineering Material Industrial Supplier***

PT. Hefram Asasta Indonesia is a private enterprise national that gives the best solution in water treatment for clean water and wastewater for domestic use, commercial, industry, and urban which includes new installation, upgrading, disposal, recycling, and seawater desalination.

To support excellent service, we always prioritized customer satisfaction as the main benchmark in every procurement of goods/services. Because we realize the progress of the company depends on every customer's satisfaction.

PRODUCT INTRODUCTION

There is an art to using just the right amount of plasticizer in an EPDM membrane. Use too much, or the wrong type, and emulsifying fats can leech plasticizer and cause shrinkage and increase hardness. Use too little, and the rubber loses its memory, bubble size increases, and the membrane is at risk for flexure failure. Our product has a great deal of experience experimenting with different types and amounts of plasticizer, as well as other components of formulated EPDM rubber, such as fillers and curatives, and we put this experience to work.

Our Product

| Product Name | Fine Bubble Diffuser | | |
|--------------------------------------|----------------------|---------|---------|
| Size (Inch) | 8 Inch | 10 Inch | 12 Inch |
| Drat | 3/4" | | |
| Outer Diameter (mm) | 215 | 280 | 330 |
| Membrane Diameter (mm) | 192 | 255 | 300 |
| Bubble Diameter (mm) | 1-3 | | |
| Air Flow Range (Nm ³ /h) | 1 - 2,5 | 1 - 4 | 1 - 6 |
| Normal Air Flow (Nh ³ /h) | 1,8 | 2,5 | 4 |
| Max. Work Temperature (°C) | 80 | | |
| Membrane Material | EPDM | | |
