OREX MINI VERTICAL LASER

Mini Laser Vertical Tool

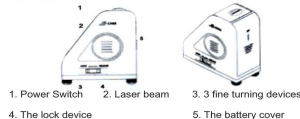

Red Beam
#O01-JB-LV66

MODEL LV66

OPERATING SPECIFICATION

1. Structure

2. Technical Specification

Dimension : 75 X 75 X 35mm
Technical Data

- Laser wavelength : 635nm
- Vertical accuracy : + 1mm / 5mm
- Angle of projection : > 140°
- Automatic supplementary area : + 5°
- Weight : About 0.2kg
- Power Source : 2 AA batteries (DC 3V)
- Operating temperature: -5°C ~ +45°C

3. Function

- Floor line
- Plumb line
- Measuring the upper and lower benchmark points

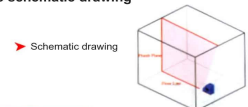

4. Operating Steps

- Open the battery cover in the indicated direction, and put in 2 AA batteries.
- Turn the lock switch to RELEASE.
- Press the power switch, a laser vertical line is emitted, and the device is ready for use.
- After completion of the work, press the power switch to turn off the laser vertical line.
- Turn the lock switch to LOCK, and put the device into the tool case.

5. Attention

- The product should not be dismantled, which may cause accuracy deflection.
- Keep it away from the wet, high temperature, vibrating or dusty areas.
- Turn off the power before moving the device.
- The laser beam should not be pointed direct into the eye.
- Do not touch the laser beam with hand, clean it with soft cloth.
- Take out the batteries if the product will not be used for a long time

6. Site schematic drawing

Sketch map of construction site

- Indication line for installing lamps and drilling holes in the ceiling.
- Indication line for installing the dust-frame ceiling and inspecting doors.
- Indication line for constructing the partitions.

7. Accessory

1. A leather case 2. An instruction 3. An outer box (optional)
