

Datasheet

Wire model : AGR-TR (Silicone rubber insulated wire)

Stock No: 2101260

Cross Section

1	Conductor
2	Insulation

Physical characteristics

Conductor

Conductor section	0.75mm ²
Conductor material	Tinned copper wire
Conductor structure	149/0.08
Diameter of a single conductor	0.08±0.005
Conductor dimension	1.13±0.10 mm

Insulation

Insulation material	Silicone Rubber
Insulation thickness	1.00
Insulation dimension	3.30±0.15 mm
Insulation color	Red

Mechanical Physical Properties

Operating temperature range	-55°C ~ +200°C
Insulation tensile strength	≧5 MPa
Insulation elongation	≧150%

Electrical properties

Max. operating voltage	300/500V
Max. conductor DC resistance	24.7 Ω/km (@ 20 °C)
Wire withstand voltage test	1500V/min
