

# F10 SUPER CONCENTRATE DISINFECTANT INFORMATION SHEET

Our range of F10 disinfectants have been tested by independent GLP laboratories to be effective against viruses, bacteria, fungi and spores.

They are versatile and convenient to use for high level disinfection of all hard surfaces around the house and pet areas.

- pH balanced
- Non-irritating to the skin
- Food safe
- Tested safe for use in households with pets
- Highly cost effective
- Biodegradable
- Non-corrosive
- Alcohol & aldehyde free
- Non-flammable
- Leaves no stains and can be used on any surface

---

## DESCRIPTION

A safe and effective broad-spectrum disinfectant for high-level disinfection of surfaces. Effective against bacteria, viruses, mould, yeast and spores. Non-irritant, and non-corrosive in proper dilutions.

## COMPOSITION

Contains benzalkonium chloride and biguanide compounds (5.8%), ampholytic surfactants and sequestrants.

## APPLICATIONS

- High-level surface disinfection  
Dilute 10ml of concentrate for every 1 liter of water (1:100). Suitable for regular disinfection of high touch areas (light switches, doorknobs, countertops, mobile phones etc.)
- General cleaning  
Dilute 4ml of concentrate for every 1 liter of water (1:250). Suitable for mopping floors, soaking of towels, cleaning toilets, kitchens and other general areas.

## STABILITY

- Diluted solutions are stable up to 2 years. Basic principles of disinfection apply i.e. disinfectants may be inactivated by the presence of organic debris and heavy soiling. If diluted solutions have been contaminated, discard and mix up a new batch.

## STORAGE

- Store in a cool dry, well-ventilated area out of direct sunlight. Store in suitable, labelled containers. Keep containers tightly closed.
