## Product Description

RS PRO Distribution Terminal Blocks save space and increase wiring efficiency of large incoming cable supplies by offering one large input terminal and multiple smaller outgoing terminals.

The tinned copper block construction ensures excellent connectivity, while the translucent, hinged, removeable protection cover allows for visual inspection of the connection.

Safety is afforded by the UL Approved finger protection.

The large Hex-drive clamping screws are a minimum of 95% of the terminal internal diameter for excellent electrical contact:

- Used to split large cable incoming supplies to multiple smaller cables/loads
- Typically used in Control Panels and electrical equipment with multiple internal circuits taking their supply from one source
