

# Lever Action Grease Gun

The Tecalemit heavy duty, high pressure lever action grease gun develops over 10,000psi of greasing pressure.

The grease gun is compatible with 450g cartridges or bulk fillable to 750g and is supplied with a rigid extension tube and four jaw hydraulic connector.

Suitable for use in underground applications, coal mines, quarrying equipment, transport, heavy engineering, farm machinery and automotive workshops.

Featuring a precision ground piston and fitted to a forged brass head which completely eliminates the use of unreliable O-ring seals. The barrel design features a coarse machined thread that eliminates cross threading leading to better performance and durability.

## Features

- 150mm rigid extension tube.
- Designed for heavy duty high pressure applications.
- Up to 1.2g per stroke.
- Compatible with 450g cartridges for contamination free greasing.
- Suitable for either cartridge or bulk filling.

Mining

Transport

Farming

Workshops
