RS Stock No: 171843

A2, 304 Stainless Steel, Hexagon Countersunk Socket Screws: Metric Thread

Countersunk Socket Screws are designed for light duty applications where there is limited space. These screws are widely used in many applications where a strong and reliable joint is required. Typically, countersunk socket screws are used to fasten plates and strips of metal to equipment and machinery, as their flat head allows a flush and flat finish. This range of A2, 304 Stainless Steel countersunk socket screws with hexagon drive offer a good form of corrosion resistance and should be chosen over steel when corrosion resistance is required. However, A4 316 Stainless Steel, which is also available from the RS Pro range should be used in higher corrosion and/or chemical environments.

- Threaded in accordance with DIN 7991 Standard
- A2 grade 304 Stainless Steel
- · Used in applications where a wider head and lower profile is required
- Suitable for light fastening applications
- Typical applications include; machine tooling, security guarding, panel building and general fastening applications
- Requires a Hex Key / Allen Key

Please view our full range listing below for all A2, 304 Stainless Steel Hexagon Countersunk Socket Screws:

Head Shape	Material	Thread Size	Length	RS Part No.		
Countersunk Socket	Stainless Steel	M3	10 mm	171792		
Countersunk Socket	Stainless Steel	M3	12 mm	171809		
Countersunk Socket	Stainless Steel	M4	10 mm	171815		
Countersunk Socket	Stainless Steel	M4	12 mm	171821		
Countersunk Socket	Stainless Steel	M4	16 mm	171837		
Countersunk Socket	Stainless Steel	M5	12 mm	171843		
Countersunk Socket	Stainless Steel	M5	16 mm	171859		
Countersunk Socket	Stainless Steel	M5	20 mm	171865		
Countersunk Socket	Stainless Steel	M5	25 mm	171871		
Countersunk Socket	Stainless Steel	M6	12 mm	171887		
Countersunk Socket	Stainless Steel	M6	16 mm	171893		
Countersunk Socket	Stainless Steel	M6	20 mm	171900		
Countersunk Socket	Stainless Steel	M6	25 mm	171916		
Countersunk Socket	Stainless Steel	M6	30 mm	171922

******Notice***** DIN 7991, ISO 10642, and ANSI B18.3.5M are not Intended for high strength applications. The only purpose of having them produced in property class 10.5 or 12.3 is to increase the wear resistance of the socket drive.
