RS PRO Loop Link USB Communications Interface

Stock No: 1926530

- USB connection
- For Configuration Software version 5.0

Description

- Loop Link 1926530 is a communications interface for configuration and monitoring of RS PRO PC-programmable devices using our Configuration Software.

Application

- The Configuration software is used for the configuration of these devices: 1926531,1926532,1926533,1926534,1926535, 1926536,1926538,1926539
- Used in combination with 1926531,1926532,1926533,1926534, 1926535,1926536,1926538 and 1926539, the Configuration Software can also be used to save configurations from the following devices to the PC and download these configurations to subsequent devices of the same type: 1926531,1926532,1926533,1926534,1926535, 1926536, 1926538,1926539

Technical characteristics

- Loop Link 1926530 consists of a communication box with USB cable to the PC and necessary cables for connection to the devices. The communication box is supplied from the USB port of the PC.
