

Datasheet

Frequency/ Current Converter 0 to 5KHz

RS Stock number 223-357

Frequency to Current Converters

These are dc powered, fixed frequency to isolated 4 to 20mA output converters. They are configurable to accept signals from a variety of sensor types and have a transducer power supply suitable for NAMUR sensors.

Input Range	0 → 5 kHz
Input Type	Frequency
Mounting Type	DIN Rail
Output Range	4 → 20 mA
Output Type	Current
Signal Conditioner Type	Filter
