RS Stock No.: 2223776

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

**Product Description**

*HypaClens Sterile Eye Wash Bottles are ideal for washing and rinsing eyes, providing sensitive moisture replenishment for eyes that have been contaminated with particles, smoke, dust or liquid. The HypaClens Sterile Eye Wash Bottle contains 0.9% sterile saline solution which is ideal for irrigating eyes and even other general wound washing applications.*

*The 250ml eye wash bottles help you to have adequate eyewash facilities at your place of work, as HSE guidelines state that you will require at least a litre of eyewash available at any one time in a workplace environment.*

*HypaClens Sterile Eye Wash is a single-use medical device intended for emergency eye irrigation. As per HSE guidance, following eye contamination with chemicals or small particles, you should wash the eye out with either clean water or sterile fluid from a sealed container for at least 10 minutes.*

*HypaClens Sterile Eye Wash is designed to be a substitute for clean running water in first aid situations and is only intended to be used once. Reuse of the bottle would mean the contents were no longer sterile and could pose a risk of infection. For this reason, the bottle is designed so it cannot be resealed. After use, any excess fluid remaining in the bottle should be discarded. HypaClens Sterile Eye Wash is also suitable for flushing wounds.*
