## RS Pro Infrared Handset, Infrared, Remote mount, 3 V dc

RS Stock No: **796-2097**

### Product Details

RS Pro infrared lighting control handset has a voltage rating of 3 V dc and is remote mountable. It is used for the operation, configuration and programming of the RS wireless lighting control system products. The handset operates in four modes namely user mode, configuration mode, sensing mode and scene mode. The programming is achieved by pressing a number of buttons in a sequence and then transmitting the sequence to a device by pressing the arrow/send button. This handset has an IR range of 7 m.

### Features and Benefits

- Used for the operation, configuration and programming of the RS wireless lighting control system products
- Operates in four modes namely user mode, configuration mode, sensing mode and scene mode
- Programming is achieved by pressing a number of buttons in a sequence and then transmitting the sequence to a device by pressing the arrow/send button
- IR range of 7 m
