

5V USB LED STRIP

Our 5V LED Single colour tape uses long life super bright LEDs and features very low power consumption of just 4.8watts per metre for the 60 LEDs per metre. Our range of LED Strip lighting is supplied on a flexible printed circuit board (PCB) which is white / black in colour and has a 3M sticky tape backing making installation extremely easy. Just peel off the backing cover and stick down to any flat clean surface

Features:

- Fitted with 1 Metre USB input cable
- Power directly from your computer or TV
- Plug into any device with a 5vdc USB port
- Cool White 6000K light output
