

Plumbing Kit

ENGLISH

Heatshrink Plumbing Kit

The Plumbing Kit is designed to meet the needs of plumbing fitters working on all types of services be it gas, air, refrigerants, water, oil, etc. It contains a number of high quality heatshrink sleeves so that the point of termination can be identified, and protected against future possible corrosion. Clear heatshrink is also provided which can be used to cover any additional label identification for full traceability in the future. As an additional temporary low pressure repair, a red adhesive lined sleeve is included for low pressure applications. Dimensions: 241x195x56mm.
