IPC101-5M-B Camera Data Sheet

Contents

Overview

Adopting a 5 megapixel progressive scan CMOS sensor with a 2.8mm fixed lens, the network camera can provide a high- definition professional surveillance and security solution. Designed for indoor and outdoor environments, ideal for home, shop and other SMBs.

- Captures 5MP Super HD Video, 2D/3D DNR
- With IR Range, Night Vision Distance up to 30m (98ft)
- Smart H.265+ Reduces Bandwidth and Storage, While Preserving High Image Quality
- Water and Dust Resistant (IP67)
- Clear Imaging Against Strong Backlight Due to WDR

Key features

Plug and play PoE connection

With only a single ethernet cable to get powered and transmit video, PoE (Power over Ethernet) cameras allow you to DIY their positions anywhere you want. No need of a separate power adapter for power supply of each camera, simplifying installation and helping to keep costs low.

DWDR

Cameras with Digital Wide Dynamic Range (DWDR) can produce images even under varying light conditions. It can also maintainproperimage brightness, exposure and contrast to ensure good image clarity. WDR is measured in dB. A WDR of range can capturegreaterscaleof brightness.

3D DNR

Developed for shooting at night or in dimly lit places, 3D Digital Noise Reduction (DNR) decreases picture noise and reduces colourmixture errors. 3D DNR removes the grainy fuzzy appearances of low light images, will handle moving objects without leaving tails behind, and in low light, it makes an image clearer and sharper compared to no noise reduction or 2D DNR. 3D DNR is essential toproducing a clear image from your security cameras.

Smart IR technology

Smart IR technology can detect the infrared (IR) wavelengths, enabling the cameras to see even in low light condition or in complete darkness, and providing protection day and night.

IP67 protection

IP67 rated housing protects the camera against rain and dust. Capable of withstanding temperatures from -30 ~ 60 ° C(-22~140°F), the cameras perform well even in demanding environments.

H.265 and smart encoding technology

Smart encoding technology can reduce storage costs without sacrificing resolution and frame rate. Under the same configuration, H.265 with smart encoding technology only costs one hard disk to store the same video record which needs four hard disks under H.264, saving 75% storage cost.

Multiple ways of management

The camera supports different ways of management. Free monitoring softwares and Apps are available to view, manage and record the camera through the connected NVR, computer or mobile phone.
