OVERVIEW

STYLE	SIZE	EXTENSION HEIGHT	NUMBER OF POSITIONS	REACH HEIGHT EXTENSION LADDER
Multi-Position Ladder	13ft	7ft to 11ft	16	14ft 3in

The light weight MT-13 14ft reach Multi-Position Ladder is versatile and easy to transport. The adjustable telescoping design allows the ladder to be used in 5 different positions -- Twin Step Ladder, Stairway Step Ladder, Extension Ladder, Wall Ladder and as 2 Scaffold Bases. In the Step Ladder mode, this hybrid ladder can be used for one or two person jobs with a duty rating of 300lb per side. The feet are slip resistant and the ends of the multi-position ladder are flared for firm support. Smooth curved rails allow for comfortable climbing. With its many uses, this Multi-Position Ladder fits all your climbing needs.

BUY NOW

FEATURES

- Now Lighter Weight!

Stablizer

How does one install the AC96 stabilizer on the 22ft MT 22 ft ladder.
It does not fit on top rung.

Poor product support

2 years old and need parts. No online support for partlist. No capability to order online. Product distributors and retailers haven't got a clue. Tell customers to contact Werner instead.

Not Happy!

I have had this ladder for a few years and would expect it to last pretty much a life time. I used it today and noticed one of the legs was bent. The support bracket rivot had come off causing the leg to bend. Tried to hammer the leg back straight and it ended up cracking so now I don't dare use it. Really liked the ladder up to this point. It is heavy but really a sturdy ladder. I now own a heavy paper weight in my garage.

Versatile, reliable ladder. Great customer service

I have owned this ladder for about 10 years and and it has performed flawlessly. Love the adjustable feature that allows me to use safely on stairs. I recently needed to contact customer service and was overjoyed with the response from Werner. Prompt replies to my emails and competent, professional communications. My next ladder will be a Werner!

Scary. Not even very stable at main joint.

I bought this ladder about 8 months ago. My first impressions while using the A frame portion were good, I was impressed at the ease of use. Then I used the straight portion at full extension, scary. The main joint is down right scary how loose it is. This ladder flexes a insane amount at the joint. When you get to that point mid body, it catches you off guard at the unexpected movement, maybe causing a fall at some point . Mind you I am 280#, but that's why I bought a 300# capacity unit. i don't trust it in the extension portion when the main joint is under full strain. I do not recommend this ladder, in turn I wish I would of just bought a a frame, and a 20' extension ladder as I am now on the hunt for a extension ladder to make up for this ones short coming. Definitely avoid if you are nervous on ladders, I usually am " comfortable but cautious" on ladders, this ladder scares me.

faulty top lock on my MT-22

Top locking device is stuck in the "out" position and will not lock. Other side locking device still works. Only the 3rd time that I have used the ladder so looking for advice on how to get it to lock in properly.

Top Quality

Easy setup, secure and versatile. I feel very safe when I need to climb this ladder, WERNER makes a good product. That was my main reason for the purchase. This ladder is easy to carry and maneuver.

Great ladder except claimed length.

This is a great ladder if you need 11' like I needed, no way it is 14' claimed here. I read few reviews, found one on sale and bought it. It is heavy duty and well made for sure, stable and easy to set up, fits in the trunk of car without folding seats. Even though made in China, it is quality for sure.

I have had the 26-ft multi-position ladder for less than a year and just noticed that two of the rivets are completely missing. What is the best way to get that repaired or replaced? I'm concerned for the safety of the ladder now. Pics available if needed
