

FEATURES

- Direct flow
- Easy and fast filter change
- Filter change warning
- Replacement recommended every 36 months
- 600 gallon per day membrane cartridge
- Reduces heavy metals, arsenic, asbestos, benzene, fluoride, formaldehyde, nitrate, nitrite, trichloromethane and combats most other chemical and organic contaminants

RS PRO Water Filter Systems

RS Stock No.: 2499556

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Smart direct flow reverse osmosis membrane cartridge

Product Description

Unlike traditional RO units, our RO Pro unit which has fast-filtering capabilities ensures a standard glass can be filled in 12 seconds due to the high water flow rate of the 600 gallon per day membrane.

The slimline design of the RO unit compliments any kitchen and fits neatly underneath the kitchen sink which saves space and looks aesthetically pleasing in any home by combining the traditional 5 filtration unit to 2 filters.

The advanced technology eliminates more than 1000 contaminants keeping your water safe from chlorine, limescale, sediment, bad taste, heavy metals, odour, and also combats both chemical and organic contaminants such as arsenic, asbestos, benzene, fluoride, formaldehyde, nitrate, nitrite and trichloromethane.

General Specifications

Maximin flow rate	2 litres per minute
Dimensions	370mm x 95mm diameter
Inlet temperature	5 deg C to 38 deg C
Inlet TDS	1500ppm
Maximum pressure	4 bar
Filter cartridge	600 gallon per day membrane
