

Datasheet

RS PRO Polypropylene Cable Tie

Stock number: 178-9487 178-9488

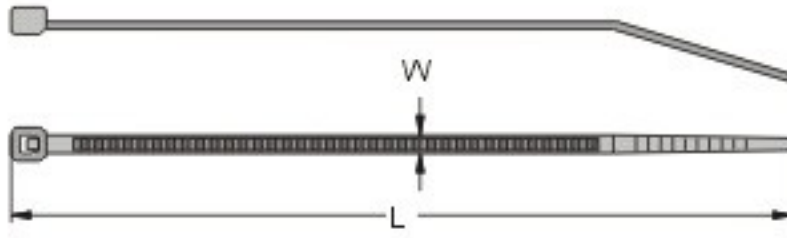

EN

Features

- Material: PP, good at chemical resistance from different density of base and acid
- Color: Black (Natural is also available)
- Polypropylene cable ties for higher chemical resistance
- Due to its low density PP cable ties can float on water
- Less hydroscopic material, almost no water absorption

- Function: For fixing cable used at chemical industry. Increase the durability of cable tie application in chemical circumstance.

Unit: mm
