

FEATURES

- Solder sucker, de - soldering gun
- Standard model
- Hand operated.
- Fast sucking action via the spring loaded piston
- Prevents solder sticking

RS PRO Solder Sucker, 190 mm Length

RS Stock No.: 479-4197

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

The RS Pro Solder Sucker de-soldering gun is a standard model hand operated tool. The solder sucker is a professional and quality tool used to cleanly remove solder plus providing joint dis-assembly. To assist you in removing solder the solder sucker picks up the debris by sucking it up via a spring-loaded piston, released by a push button and re-primed by a plunger. Extraction springs are located outside the vacuum chamber and this helps to prevent the solder sticking and prolongs the life of the solder sucker. This RS PRO model has a PTFE nozzle and the main body of the desoldering gun is made from aluminium.

General Specifications

Body Material	Aluminium
De-soldering Tool Type	Solder Sucker
Applications	To remove solder from a PCB

Electrical Specifications

Anti-Static	No
ESD Safe	No

Mechanical Specifications

Length	190mm
Nozzle Material	PTFE
Size	Standard
Barrel Diameter	20mm
Nozzle Length	20mm
Tip Outside Diameter	3mm
Tip Inside Diameter	1.5mm
Weight	56g

Approvals

Compliance/Certifications

CE , ANSI, OHSA
