

# Extended Spike Test Probe multicomp<sup>PRO</sup>

RoHS  
Compliant

## Description

Test probes are developed to meet electrical testing requirements in a variety of applications and provide a reliable means of testing bare or loaded circuitries where a number of contact points must be accessed. They are designed for cable connection by soldering or crimping, depending on the metal inserts used. Crimping is the preferred type of connection, but it requires special tooling, so most customers buy probes ready assembled onto cable.

Extended spike test probe rated 1K CAT III, 10A test probe for connection to standard shrouded 4mm plugs.

Material : Nylon 66 / Brass, Ni plated.

Colour : Blue

Dimensions : Millimetres

## Part Number Table

Description	Part Number
Extended Spike Test Probe, 1kV, CAT III, 10A, Blue	MP770915
