RS PRO Gas Soldering Iron Kit

RS Stock No.: 182-3821

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This compact gas soldering kit from RS PRO is a high quality and efficient soldering iron kit ideal for a wide range of soldering applications. This handy kit comes complete with everything you need to complete soldering tasks with ease including a highly durable gas powered soldering iron, various tips, sponge, solder storage tube and more all stored in a handy and durable case. The iron includes an auto ignition feature for safe and easy operation, with variable torch control for soldering with precision. The portable gas soldering iron is powered by butane gas meaning you're not tied down with power cables, wires or plugs and features a handy window to allow for quick and easy checking of gas levels.
