Heatshrink identification sleeves

Applications

Heat shrinkable identification sleeves that are manufactured from high quality, flame retardant polyolefin with excellent performance properties. The identification sleeves are extremely flexible with a thin wall design allowing them to be used with printers; reducing errors, time and cost.

Characteristics

- Shrink ratio of 3:1
- Flexible, flame retardant
- Abrasion and chemical resistance
- Reliable physical, chemical and electrical property
- Pre-cut tube with dotted line for tearing off the tube easily.

Operating temperature range

- Operating temperature : -55°C ~ 125°C
- Minimum shrink temperature : 70°C
- Minimum fully recovery temperature : 110°C

Approvals

UL224 125°C VW-1

Conform to AMS-DTL-23053/5 class 1, SAE-AS81531, MIL-STD-202
