

Datasheet

RS PRO Female RCA to Male XLR Adapter, Metal

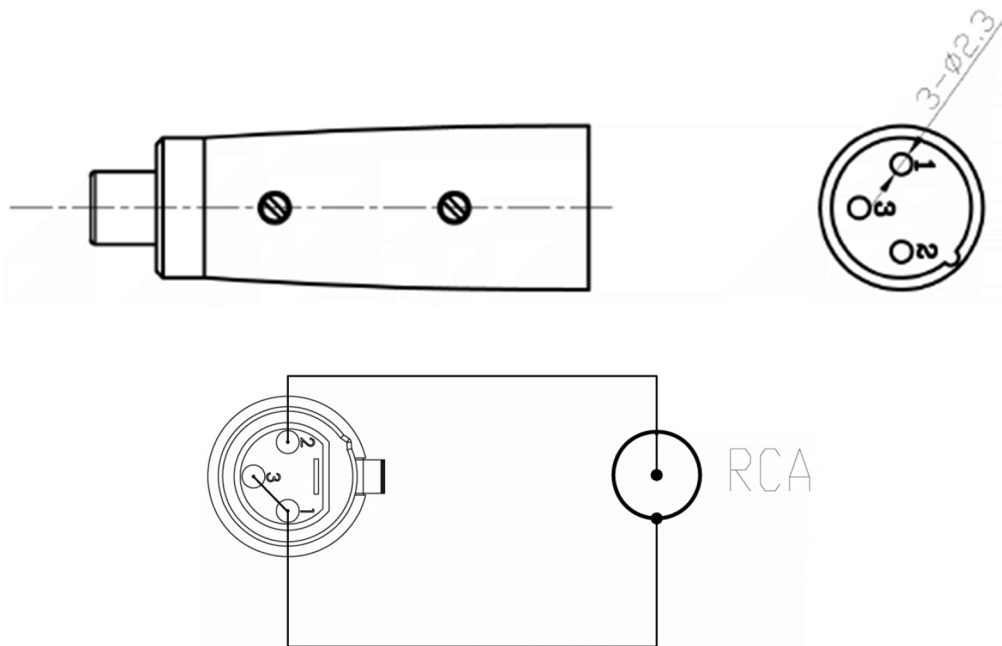

Stock number: 192-4471

EN

The RS PRO female RCA to male XLR adapter is a metal adapter which has a single female RCA connector on one side and a three pin male XLR connector on the other side.

The pins are gold plated which helps with anti-corrosion and ensures a good connection for better audio quality.

XLR cables are generally used for sound, video and lighting equipment. An adapter such as this could be used to convert an RCA audio device to connect to an XLR port on other audio equipment.
