DPF Regenerator & NOx Sensor Protector

For all diesel engines

Wynn's DPF Regenerator & NOx Sensor Protector has been developed to clear blocked particulate filters and reduce soot emissions in all diesel engines. It is also designed to protect the NOx sensor against contamination.

Properties

- ✓ Easily cleans and regenerates a blocked diesel soot filter without dismantling
- ✓ Catalyst for optimized combustion of soot particles
- ✓ Cleaning effect on NOx sensors to avoid AdBlue contamination problems
- ✓ Reduces the combustion temperature of soot so they burn off faster and at a lower temperature
- ✓ Restores engine Performance
- ✓ Avoids maintenance costs related to DPF
- ✓ Especially suited for short driving cycles. Super-fast results!
- ✓ Stops oil dilution from excessive regenerations
- ✓ Can be used in combination with built-in regeneration systems
- ✓ Has a cleaning effect on the outlet side of the turbo
- ✓ Harmless for all after-treatment systems

Applications

- ✓ Suitable for all diesel engines, trucks, buses, stationary equipment, boats, etc.
- ✓ Highly effective for all diesel fuels to B30 as well as off-road fuels

Due to the versatility of the application possibilities, it is impossible to mention all details and we do not assume any obligations or responsibilities resulting from this. When a new edition appears due to the technical development, the preceding data are no longer valid.

Product specifications

Directions

- ✓ Add 1 litre to the vehicle fuel tank (Treats up to 500 litres of fuel)
- ✓ Add 1 litre to a minimum of 75 litres of diesel
- ✓ Use in case of stop start driving & regular DPF issues use every 10,000 KM

Packaging

W28090– 12x1L - EN-FR-DE-NL-ES-IT - JA
