

## Datasheet MSS09/031 AGFT Whis UV

ENGLISH

AGFT Whis UV is a closed cell polyethylene foam which has cells that are subsequently opened through the manufacturing process, resulting in a highly efficient sound absorption material with a number of unique features.

Light weight by design, its closed cell structure makes it water resistant without the application of a secondary skin. With excellent acoustic performance the product meets a number of fire safety standards.

AGFT Whis UV is ideal for external applications, as a result of the chemistry it provides a UV stable acoustic foam, making it suitable for applications such as acoustic screens and fencing as well as wall panels.
