Half of every day is night, but in the most dangerous environments the work goes on 24/7. Pelican's new Safety Certified flashlights turn night into day, even when explosive gases are present. Innovative safety features include a secondary downcast LED to reduce trip/fall accidents and glow-in-the-dark body material that can be seen even when off. And, of course, fully certified Class I/Division 1 safety approvals that allow use in the most extreme hazardous areas.
