

Polyimide Film Tape with Polyimide

Polyimide film and silicone adhesive used for PCB solder masking and other high temperature applications. This product is amber Colored and 2.7 mil (69 microns) thick.

Features

- The polyimide film does not soften at elevated temperatures, thus the film provides an excellent release surface at elevated temperatures
- Dimensionally stable at high temperatures, which helps reduce rework, helping to enable high productivity
- Flame retardant, chemical and radiation resistant which helps protect surfaces to help reduce replacement costs
- The silicone adhesive's high temperature performance helps reduce adhesive transfer which helps to eliminate cleaning, enabling high productivity
- Polyethylene tape core instead of cardboard
- Polyimide Film with UL 510 flame retardant.
