Axial Fans

Product Description

These RS PRO Axial Fans are ideal for telecoms servers with high density systems where powerful fans are required to dissipate heat. In these extreme performance environments where higher speed and higher capacity hard drives are more susceptible to vibrations, these fans can offer a high airflow/pressure and low vibration solution to meet the requirements.

Besides the great performance, benefits also include:

- 1. High reliability and long-life which can save the customer the cost of maintenance and downtime.
- 2. EMC solution built into fan unit.
- 3. High PQ Performance which provides reliable solution when Telecom systems are required to dissipate heat
- 4. Low noise design
- 5. High efficiency reduces power consumption and meets ErP standard
