RS PRO Angled Bracket for DIN Rail

RS Stock No.: 606-866

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This range of RS PRO angled horizontal and vertical brackets feature a lightweight yet highly durable construction. The horizontal bracket is commonly used to brace horizontally mounted support rail between two vertically mounted rails and supporting heavy electrical equipment such as large transformers, contactors and more. The vertical brackets with reinforced corner web is ideal for frame construction. Both brackets are also suitable for use with a support rail in a range of applications.
