RS Black Test Lead Extension Reel, 12m Cable Length

RS Stock 612-0829

Specifications

On some occasions the need for a lead longer than the standard length is required. This reel holds just over 12 metres (40 foot) of the highly flexible double skinned silicone cable as used on the standard lead assemblies. One end of the lead is terminated in a 4mm right angled plug, the other has a 4mm socket into which the original lead can be plugged. Designed to be robust and sturdy.
