Product Description

These handy set screws from RS PRO are perfect for keeping moving parts secured in place. They're commonly found in a wide range of applications, including engineering, product design and repair. You're likely to see them locking a gear to its shaft, for example.

These set screws feature M6 threading through their entire body length. They conform to Electrostatic Control Standards ANSI/ESD S20.20:2014 and BS EN 61340-5-1:2007, preventing damage due to electrostatic discharge. The screws undergo strict testing to ensure their quality and durability as part of our trusted RS PRO range. Finally, they're hex-headed, which means they can be tightened easily using a standard spanner.
