

FEATURES

- Self-tapping screw with hexagonal head
- Zinc-plated steel for corrosion protection in indoor applications
- To DIN 7504

RS PRO Bright Zinc Plated Steel Self Drilling Screw No. M8 x 25mm Long

RS Stock No.: 546-5985

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

From the trusted RS PRO brand, these zinc plated steel self-drilling screws offer all the advantages associated with standard self-tapping screws but are capable of drilling their own pilot holes into sheet metal as well as softer materials. As they have a pan head they offer great surface retention between the screw and the surface material. They also feature a pozidriv head for excellent torque while driving.
