It is again a very special event at Suba Engineering. We are excited to release our new **SubaScope** 2020 Perfect Vision, Q1 2020 model. An "Australian" digital auto-focusing Microscope with a zoom of up to 200x. The advanced version now comes with new features like, mouse-controlled auto focus region, measurement software, digital comparison of a still picture to the live picture and many more software features. We use our 3-D printers & CAD software to make parts inhouse.
