Clean Energy and Transportation Internship – Job Description

Clean Energy and Transportation Intern

Energy and Environmental Research Associates, LLC (EERA) specializes in providing timely, accurate, and useful analyses of today's most pressing energy and environmental problems. Our team provides an array of product deliverables ranging from analytical reports, project or policy evaluations, software design and development, and strategic planning consultation.

The Clean Energy and Transportation Intern will perform research and analysis on issues related to clean energy and transportation including, but not limited to, electric vehicles, alternative fuels, heavy-duty freight, and transportation impacts on public health. Primary duties may include writing research reports, collecting and analyzing data, communicating with industry contacts, and producing public-facing content in support of Energy and Environmental Research Associates' (EERA) ongoing activities.

The Clean Transportation Intern will be expected to work remotely using standard productivity tools including Microsoft Office, Google Meet, and Dropbox. Data analysis tools may include Excel or other statistical software, including Python or R programming languages.

Please submit cover letters and resumes to jobs@energyandenvironmental.com.
