

THE INTELLIGENT SOLUTION

Today's electric vehicles are designed to meet the needs of everyone. However, most charging networks are not.

The EOS Charge station, built with a modular framework, encompasses state of the art technology including edge computing, readily adapts to changing market demands and incorporates technology upgrades without disruption.

Going green has never been easier... or more affordable! In most cases, our EV charging stations are installed at no cost to the owner and are valued at over \$150,000 .

THE EOS DIFFERENCE

At EOS, we have created a charging solution available to all drivers, compatible with electric vehicles built on the universal J1772 and CHAdeMO charging standards.

- User friendly, universal charging
- Convenient locations

EOS CHARGE

THE INTELLIGENT SOLUTION

INSTALL, MAINTENANCE, & UTILITIES INCLUDED

In most cases, adding EOS Charge to locations is free! Yes, free!

Going green doesn't have to be costly when you partner with EOS Linx. EOS covers the cost of the equipment, installation, maintenance and pays for all utility bills. We install two EV chargers at each location with the option to install additional chargers. We are committed to supporting EV growth and are committed to helping communities take the necessary first step to achieving sustainability goals.

- No risk installation
- No out of pocket installation costs
- No hidden fees
- No equipment or utility costs to site
- Service & maintenance included

HOW IT WORKS

At EOS we understand and respect the details...as well as your time.

We handle all aspects of the EV charger installations:

- EOS prepares and submits municipal contracts
- EOS coordinates engineering plans for approval by the location owner
- EOS facilitates permit approvals and utility coordination
- EOS oversees the installation process (1-2 days onsite)
- EOS provides ongoing service & maintenance
- And more!

OUR COMMUNITY COMMITMENT

A portion of ad space is donated to our Partner...

The National Center for Missing & Exploited Children® is a nonprofit whose mission is to help find missing children, reduce child sexual exploitation and prevent child victimization.

FAQ's

Where is EOS Charge placed?

Each EOS Charge station is installed over the curb and equipped with 2-4 EV chargers.

How are locations selected?

Locations are selected based on several factors, including township signage ordinances, the feasibility of the physical site, and traffic patterns.

What is the cost?

In most cases, there are NO out-of-pocket costs for installation or equipment!
