

MOBILE SOLAR AND SECURITY

RESCUE AND RESTORE COMMUNITIES

RIGHT PLACE, RIGHT TIME

Communities are in immediate need of light, clean water, and security when natural disasters strike...plus power to support it all. Strategically placed throughout the country, each mobile solar station (MSS) is prepared for swift action to even the the most remote areas!

- Primed for instantaneous deployment and response
- No plug-in or ramp up time required
- Secure connectivity
- Battery backup power system
- Customize your security application with a variety of sensors
- EOS can transmit over lightweight bandwidth or the latest WIFI 6G mesh technology.

ALWAYS BE PREPARED

EOS Linx is designed for immediate response wherever the need arises.

Utilize EOS Linx to restore the basic needs of the community and its citizens and expedite the rebuilding process.

- Patented water purification technology provides clean, safe drinking water for 3,500 people per day from non-potable water sources.
- LED Light Towers illuminate levels customized to your needs.
- Ultrabright 112" x 38" static, double sided backlit panels can be branded to include important contact information.

SAFETY FIRST

EOS Linx contains a mounted camera with lights and sounds to detect and deter potential threats.

- Facial recognition
- License plate reader
- Motion sensors
- Video Analytics
- Weapons detection
- Secure communications
- Thermal tracking (COVID)

Integrate EOS Linx into your existing command center to keep law enforcement better informed with 24/7 real time alerts, accessible from any device, anywhere, anytime.

Be ready for anything.
