

EOS Linx Partners with Middle Tennessee Electric (MTE) to Install EV Chargers at Headquarters in Summer 2023

BRENTWOOD, Tenn. – (July 12, 2023) – EOS Linx, an owner and operator of a growing national, solar-supported electric vehicle (EV) charging network, is partnering with Middle Tennessee Electric Membership Corporation (MTE) to install EV chargers at its Headquarters in Murfreesboro, TN.

The customized EV charging solution includes eight (8) EOS L2 chargers. Scheduled for Summer 2023, the installation will showcase the EOS Linx Axis™ Charge Station. The Axis™ incorporates two (2) EV chargers as well as a branding opportunity on the 48” high x 29” wide static panel. The agreement also includes three (3) EOS Nova™ Charging Stations that hold a total of six (6) EV chargers.

“We are thrilled to partner with Middle Tennessee Electric to bring EV chargers to their headquarters in Murfreesboro, Tennessee to serve fleet and employee vehicles, as well as support visitor charging. Both EOS and MTE are committed to supporting the growth of EV infrastructure. This partnership is the first step we are taking together to help achieve our shared vision” says EOS Linx CEO, Blake Snider.

For more than 80 years, MTE has provided affordable, reliable, safe electricity and helped residents take control of their electrical usage and navigate the energy landscape. Today, MTE continues to serve its members as a trusted energy provider and advisor by helping them tailor their energy use to meet their individual lifestyles. EOS is excited for the opportunity to work with MTE and install EV chargers at headquarters as well as evaluate an expanded relationship in the future to include a go-to-market plan for residential deployments utilizing a white-labeled, seamless back-end integration.

“Middle Tennessee Electric is proud to partner with EOS Linx and bring more EV chargers to Tennessee,” says Brandon Wagoner, MTE’s Manager of Strategy Execution & Analytics. Together we can make EV charging opportunities more widely available in our communities and serve as a role model for EV adoption initiatives nationwide.”

About EOS Linx

EOS Linx owns and operates a growing, national electric vehicle (EV) charging network committed to advancing an EV lifestyle-based solution through advanced edge technology and user-focused functionality. Our comprehensive EV charging solution includes solar power generation and storage, AI-based security, and digital out-of-home advertising that adds immediate value to each location. EOS Linx is building an EV charging infrastructure that supports the transition to sustainable transportation and creates a cleaner, healthier planet for future generations.

About Middle Tennessee Electric

Founded in 1936, MTE is the largest electric cooperative in the Tennessee Valley Authority (TVA) region and the second largest in the United States, serving more than 750,000 Tennesseans via 335,000+ accounts covering nearly 2,200 square miles in 11 Middle Tennessee counties, primarily Rutherford, Cannon, Williamson and Wilson. Municipalities served include Murfreesboro, Franklin, Brentwood, Smyrna, La Vergne, Lebanon and Mt. Juliet. MTE employs 520 people in seven local offices and its Murfreesboro headquarters. MTE’s subsidiary, United Communications, is a nationally recognized broadband company

with a fiber network spanning more than 1,700 route miles providing high-speed internet and other services to portions of Williamson, Wilson, Rutherford, Marshall, Bedford, Franklin and Davidson counties.
