

BENEFITS AND SERVICES

TURNKEY APPROACH

EOS provides the equipment, installation and managed service support for ongoing maintenance.

A CUSTOMIZED OFFERING

We design an installation plan specific to each location. At EOS we match the desired use case to the needs of the business.

ENERGY MANAGEMENT

We manage power concerns through cost-efficient design, integrated backup battery and independent grid power to avoid operational integration issues.

DUE DILIGENCE

Our subject matter experts plan each smart charging solution for deployment according to jurisdictional requirements and building codes while incorporating modular, future-proofed solutions.

Bring Electric Vehicle Charging & Sustainability To Your Community

The electric vehicle (EV) industry is an exploding market that represents a fundamental and cultural shift in transportation and the associated economics. To be successful, it requires properly implementing an EV charging infrastructure. Charging needs to happen as a part of your day, be part of your lifestyle, and a simple, efficient, and reliable customer experience. Architecting the right hardware, software, and business model is the key to providing this new infrastructure.

RELIABLE

INTEGRATED

COMPLIANT

EOS Linx Product Suite

The Aurora™

Designed to offer a fully integrated network of engagement technology, EOS' Aurora™ offers solar, advertising, energy storage & power management.

The Solstice™

The Solstice™ offers a smaller permit-friendly footprint and is modular with media customizations available.

The Axis™

The Axis™ provides two Level 2 charging units on a pedestal. Perfect for small retail lots, or additions to the Aurora™ & Solstice™ deployments.

The Titan™ & Nova™

The Titan™ is EOS' premiere Level 3 charge station. Nova™ is the ultimate charger for parking garages, city landscapes, or additions to current sites.

How It Works

EOS manages EV charger installation and related costs for qualifying locations, including equipment, maintenance, permitting, and utility coordination.

We customize an installation plan for each location, determining with site owners the number and type of chargers needed to meet growing demand. We are committed to supporting EV growth and are committed to helping our partners take the necessary first step to achieve sustainability goals.
