

Charging as a Service (CaaS)

The EOS Linx Charging as a Service (CaaS) program lets businesses lease EV chargers while keeping 90% of the revenue, offering financial flexibility and operational ease. With the EV market growing at 24.5% annually through 2030, charging infrastructure boosts customer dwell time by 35% and drives additional revenue. Plus, 70% of consumers prefer businesses with sustainable practices like EV charging.

Facts & Factors. (2022, March 15). At 24.5% CAGR, global electric vehicle market size/share to surpass \$980 billion by 2028. GlobeNewswire. | CSP Daily News. (n.d.). Offering EV chargers: Not selling electrons, it's monetizing dwell time. | McKinsey & Company. (n.d.). Exploring consumer sentiment on electric vehicle charging.

How CaaS Works

1

Lease the Equipment

Start with minimal upfront expense and access the latest EV charging technology.

2

Revenue Share Model

Pay a predictable monthly fee and enjoy the perks of EV charging with 90% revenue sharing

3

Sit Back & Earn

EOS handles the rest, from equipment management to ongoing support, leaving you free to focus on your business.

A Smarter Way to Charge and Earn

This program is perfect for businesses looking to integrate EV charging without the complexities or high costs typically associated with ownership. By choosing CaaS, you're setting the stage for sustainable growth and higher revenue potential.

ALL-INCLUSIVE SERVICE PACKAGE

EOS Linx provides everything you need, including:

- High-Quality Equipment: Cutting-edge EV chargers designed for efficiency and reliability.
- Seamless Installation: Professional installation tailored to your location's needs.
- Maintenance & Support: From routine upkeep to customer support, we've got you covered.

KEY BENEFITS

- PREDICTABLE MONTHLY PAYMENT
- 90% REVENUE SHARE TO THE CUSTOMER
- SUSTAINABILITY & INNOVATION
- MINIMAL UPFRONT EXPENSE
- SCALABLE SOLUTIONS
