

EOS Owned and Operated

The EV market is booming, and many states now require charging infrastructure for new developments. With the EOS Owned & Operated program, businesses who qualify* can easily meet these regulations and drive traffic to their location resulting in additional income without upfront costs. EOS provides, installs, and maintains the chargers at no charge, covering all electricity costs while seamlessly integrating into a larger charging network.

**A site assessment is required to qualify the location for participation in this program*

How EOS Owned & Operated Works

1

Site Assessment & Compliance

EOS evaluates your property, ensures regulatory compliance, and handles all permitting and infrastructure planning.

2

Installation & Activation

We manage the full installation process, set up metered units, and cover all electricity costs for a hassle-free launch.

3

Operation & Support

EOS maintains the chargers, provides customer support, and offers a complimentary ad spot on the digital display.

No Cost, No Hassle, Maximum Impact

This service benefits property owners, businesses, and organizations looking to offer EV charging without upfront costs or maintenance responsibilities. Ideal for retail centers, hotels, office buildings, and municipalities, EOS's solution provides a hassle-free way to attract EV drivers, generate passive income through revenue sharing, and enhance sustainability efforts.

EOS LINX CHARGERS ARE RELIABLE, EFFICIENT AND EASY TO USE, PROVIDING A FAST AND CONVENIENT CHARGING SOLUTION FOR EV'S OF ALL MAKES AND MODELS.
