

EOS Purchase Program

The EOS Purchase Program lets property owners, businesses, and municipalities own and control their EV charging network while maximizing revenue. With discounted equipment, a low monthly software fee, and 90% revenue retention, businesses can turn charging into a profit center. Plus, state and local incentives can significantly reduce upfront costs, making EV charging an affordable, high-value investment.

Invest in a Sustainable Future with Complete EV Ownership & Control

1

Ownership & Customization

Invest in your charging network with full equipment ownership and enjoy a tailored installation that seamlessly fits your facility's unique needs.

2

Direct Control

Manage the system independently to optimize performance, set pricing strategies, and capture revenue opportunities.

3

Elevate Your Property

Enhance your property's appeal by offering modern EV charging solutions that attract eco-conscious consumers.

4

Scalable Revenue

Leverage your charging network as a new income stream with a solution designed to grow alongside your business demands.

Proven Performance, Lasting Reliability

Reliability is at the heart of our offerings. Every EOS charger undergoes rigorous testing to guarantee consistent performance and support advanced functionalities. This commitment to quality ensures that your EV charging network remains robust, efficient, and future-ready.

EOS LINX CHARGERS ARE RELIABLE, EFFICIENT AND EASY TO USE, PROVIDING A FAST AND CONVENIENT CHARGING SOLUTION FOR EV'S OF ALL MAKES AND MODELS.
