

TRANSCUBE DOUBLE-WALL FUEL TANKS from EQUIPMENTLAND

TRANSCUBE™ fuel tanks are designed to quickly and efficiently handle fuel requirements for diesel equipment and temporary power applications. Constructed of Double Wall Steel, all TRANSCUBE™ tanks below carry the following approvals: CFR 49, Part 178, Sub-part N 178.700 (performance oriented standards) and Sub-part O 178.800 (testing requirements for IBC's identified in Sub-part N); UL 142 Listed for safe storage of fuel. In Canada, TRANSCUBE™ tanks are ULC S 601 approved for the stationary storage of fuel, comply with CSA-B139 (ON), are Transport Canada approved to CAN CGSB 43.146-2002 for transport full and comply with 'Transportation of Dangerous Goods' Regulations (Canada) – Section 5. All TRANSCUBE™ fuel tanks are supported by our Platinum 5 Year Warranty.

TRANSCUBE™ XG

• Double Walled, DOT Approved Fuel Container • 132 to 1240 gallon capacities
