

Product description

Description White beeswax

Beeswax is a wax of animal origin. Raw beeswax is obtained from honeycombs taken manually from the hive. The honey is melted with water. No solvent is used to obtain the raw material.

No solvent is used in the refining stage to obtain white or yellow beeswax. For these reasons, beeswax contains no volatile organic compounds (VOC).

Properties

Property	Method	Value	Unit
Drop point	Eur. Ph	61–66	°C
Colour		White	

Packaging

Physical form Tablets

Available in the pack sizes offered by Erfello (www.erfellostore.ro).
