SECTION 4: First aid measures

4.1 Description of first aid measures

Inhalation: move the affected person to fresh air and keep at rest in a position comfortable for breathing. If symptoms persist, seek medical advice.

Skin contact: remove contaminated clothing immediately. Wash the affected area with plenty of soap and water. If skin irritation or rash occurs, get medical advice.

Eye contact: rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice.

Ingestion: rinse mouth with water. Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Seek medical advice and show this safety data sheet.

4.2 Most important symptoms and effects, both acute and delayed

Repeated skin contact may cause sensitisation, showing as redness, itching or rash on later exposure; skin contact may cause redness and irritation; eye contact causes redness, watering and stinging; prolonged inhalation of vapours in unventilated areas may cause headache and nausea.

4.3 Indication of any immediate medical attention and special treatment needed

Symptomatic treatment. No specific antidote is known. Show the attending physician this safety data sheet and the UFI given under 1.1.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable: alcohol-resistant foam, carbon dioxide, dry chemical powder, water mist.

Unsuitable: direct water jet — may spread the fire.

5.2 Special hazards arising from the substance or mixture

Combustible liquid. Incomplete combustion may release carbon monoxide, carbon dioxide and other irritating decomposition products.

5.3 Advice for firefighters

Wear self-contained breathing apparatus and full protective equipment. Cool containers exposed to fire with water. Do not allow firefighting water to enter drains or watercourses.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Remove ignition sources. Ensure adequate ventilation. Avoid breathing vapours and contact with skin and eyes. Wear the protective equipment given in Section 8. Caution: surfaces become slippery.

6.2 Environmental precautions

Do not allow the product to enter drains, soil or surface water. In the event of a significant release to the environment, notify the competent authority.

6.3 Methods and material for containment and cleaning up

Absorb with inert material (sand, vermiculite, diatomaceous earth) and collect in closed, labelled containers for disposal. Clean the surface with detergent and water.

6.4 Reference to other sections

See Sections 8 and 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Avoid naked flames and other ignition sources, including unprotected electrical equipment. Do not subject the product to unnecessarily high temperatures during processing. Maintain adequate ventilation in working areas. Do not eat, drink or smoke while using the product. Follow good personal hygiene; wash hands after handling.

7.2 Conditions for safe storage, including any incompatibilities

Store in closed, preferably full containers, in a cool, dry, well-ventilated place, away from direct sunlight and heat sources. Keep away from strong acids, bases and oxidising agents. Do not re-use the empty container. Recommended shelf life: 24 months from delivery, in the original unopened packaging.

7.3 Specific end use(s)

Fragrance raw material. Use according to good manufacturing practice, within the concentration limits of the IFRA certificate for this fragrance.

SECTION 8: Exposure controls/personal protection

No national occupational exposure limit values are established for the mixture as such. For individual components, where applicable, the values of Romanian Government Decision No 1218/2006 on the protection of workers from risks related to chemical agents apply.

8.2 Exposure controls

Engineering controls: local exhaust ventilation at dosing and blending points. Do not process at unnecessarily high temperatures.

Respiratory protection: normally not required where ventilation is adequate. Where ventilation is insufficient or aerosols are formed, use a respirator with an organic vapour filter (type A, brown colour code) to EN 14387.

Hand protection: nitrile gloves to EN ISO 374-1; observe the breakthrough time stated by the glove manufacturer. Change gloves at the first sign of contamination.

Eye protection: safety goggles with side shields to EN 166.

Skin protection: long-sleeved work clothing. Contaminated work clothing should not be allowed out of the workplace.

16.3 Data sources

The classification, composition and physical and chemical data are taken from the safety data sheet of the fragrance manufacturer (KARMA KINDNESS - STYLE RANGE, dated 15/07/2024). For components without values in that safety data sheet, the acute toxicity values in Section 11 are taken from the same manufacturer's safety data sheets for other mixtures containing the same components, identified by CAS number, and are marked as such in the Source column.
