

Fire Safety Plan

IMPLEMENTATION

1 Designate an appropriate location for the safety plan

- A place you will remember
- A place where you can easily access the plan

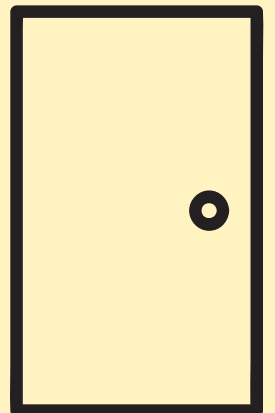

2 Utilize the fire safety plan to safely exit the building

- Identify necessary materials to bring with you
- Report the emergency to authorities
- Assess the safety of an exit route
- Follow the crowd manager

3 Assess the safety of an exit route.

- Check if a doorknob is hot
- Check for smoke
- Establish a new route to safety when necessary
- Do not use elevators
- Follow the crowd manager

4 Find the assembly point

- Remain at the assembly point
- Remain silent
- Do not reenter the building
