ABOUT THE DESIGNERS

RONAN & ERWAN BOUROULLEC
French Designers
Born 1971/1976

Ronan (born 1971) and Erwan Bouroullec (born 1976) are brothers and designers based in Paris. They have been working together for about fifteen years bonded by diligence and challenged by their distinct personalities. Their studio is based in Paris and their team numbers around six people.

Ronan and Erwan Bouroullec's designs are held in the permanent collections of major museums, including the Musée National d'Art Moderne – Centre Pompidou and Musée des Arts Décoratifs in Paris, the Museum of Modern Art in New York, the Art Institute of Chicago, and the Design Museum in London. Their work has been featured in significant monographic exhibitions, such as "Album" at the

Vitra Design Museum (2012) and "Bivouac" at the Centre Pompidou Metz (2011), as well as shows at the Museum of Contemporary Art in Los Angeles (2004) and "17 Screens" at the Tel Aviv Museum of Art (2015). Recent retrospectives include "Momentané" at the Arts Décoratifs (2013) and a comprehensive 2016 showcase across multiple venues in Rennes.

Their work has covered many fields ranging from the design of small objects as jewellery to spatial arrangements and architecture, from craftsmanship to industrial scale, from drawings to videos and photography. The designers also maintain an experimental activity with Gallery kreo, which is also essential to the development of their work.

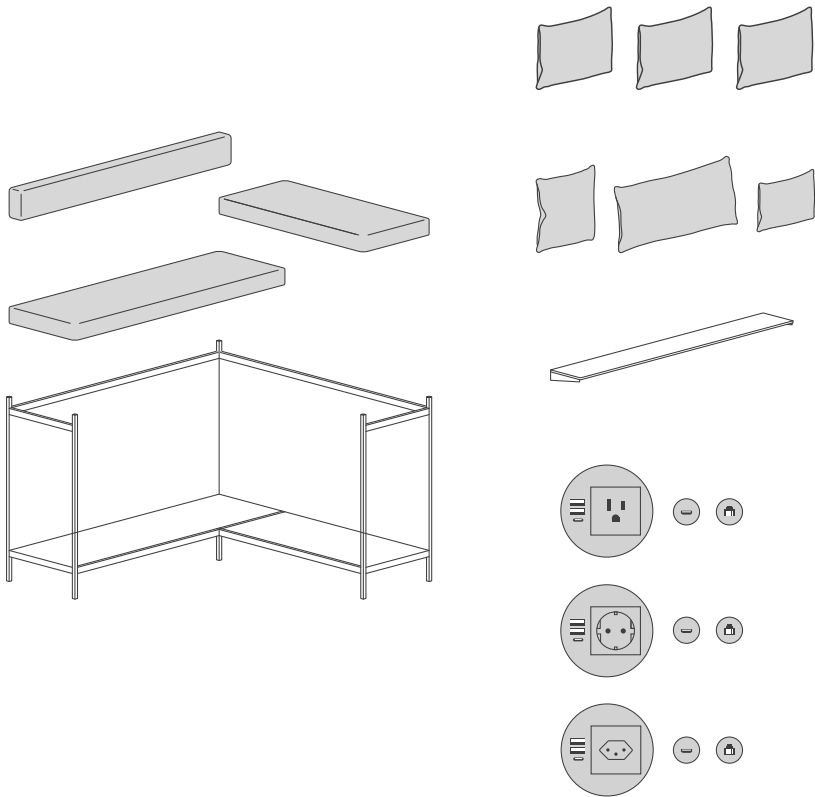

GRID

GRID

A colourful room-within-a-room, the raw shell of the Grid system provides a base for modular seating which can be integrated in different ways to create a playful and multifunctional environment for informal meetings, presentations or simply hanging out.

To assemble a complete Grid unit, additional parts, such as upholstery, work shelf & power units are available.

GRID SYSTEM

The modular system is based on a powder-coated steel frame and is designed to offer total flexibility of use as the lines between home, leisure and the workplace become increasingly fluid.

Variations include a straight module with a seat that functions as a sofa and space partition, a corner shape module enclosed by back and side panels, a U-shape module, which creates a more enveloping effect for informal meetings

SHELVING

Four Shelves

Utilising the same structure and materiality of the sofa units, GRID shelves offer a heavy duty storage solution for a live/work space.

PANEL OPTIONS

Tall side panels create private spaces while low side panels offer less visual division. Both options are available in either a oak-wood veneer, covered with an acoustic upholstery or as a metal grid that links the inside and outside of the module.

FIRE REQUIREMENTS

Fire requirement notes are for guidance only, always get approval from your local fire authority. Fire requirement must be stated clearly on customer purchase order. All products have a non-removable upholstery cover unless stated otherwise.

CRIB 5

Treatment upon request. Please contact E&S for pricing.

COM / COL

COM / CO subject to sample fabric test, please supply minimum— 100mm x 100mm. Please allow an additional 2 weeks for fabric and leather testing. The lead time will only commence once the material has been successfully approved by the factory.

CLEANING UPHOLSTERY FABRIC

Regular cleaning is important in order to keep the upholstery textile looking its best and to prolong its life. Dust and dirt wear down the textile and reduce its fire-retardant properties. Vacuum frequently, ideally every week, at half power where appropriate. Wipe upholstery fabrics made from polyurethane with a dry or moist cloth. It is usually recommended that upholstered furniture with normal commercial use

should be cleaned 2-3 times a year. Upholsteries in private households usually need less frequent cleaning. Appropriate maintenance and regular cleaning can prolong the textile's life cycle and reduce costs for renovation and repair, replacement and disposal.

CLEANING LEATHER

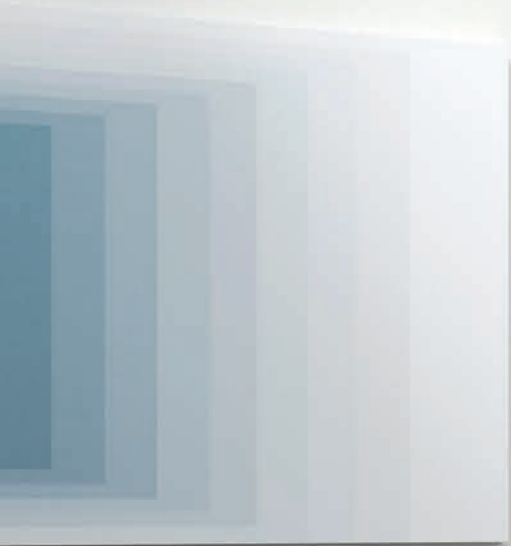

Leather is a living material that matures beautifully if treated properly. You should not place leather furniture closer than 20-30 cm to a radiator or in direct sunlight. Do not use harsh chemicals, saddle soap or unidentified leather cleaners, solvents and oils. Keep free of dust and grit. Vacuum clean leather often with a soft brush. Regularly clean contact areas such as arm and head rests to avoid build-up of perspiration and body oils, which may discolour leather. Leather can be maintained by wiping with a cool damp cloth. For tougher soiling, use a PH balanced soap on a cloth and rinse. Remember to always use cool water. Repeat if needed. Mild leather cleaning products and protection treatments are widely available, always seek instruction from the manufacturer. We recommend professional cleaning with specialist leather cleaners and conditioners in strict accordance with manufacturer's instructions.

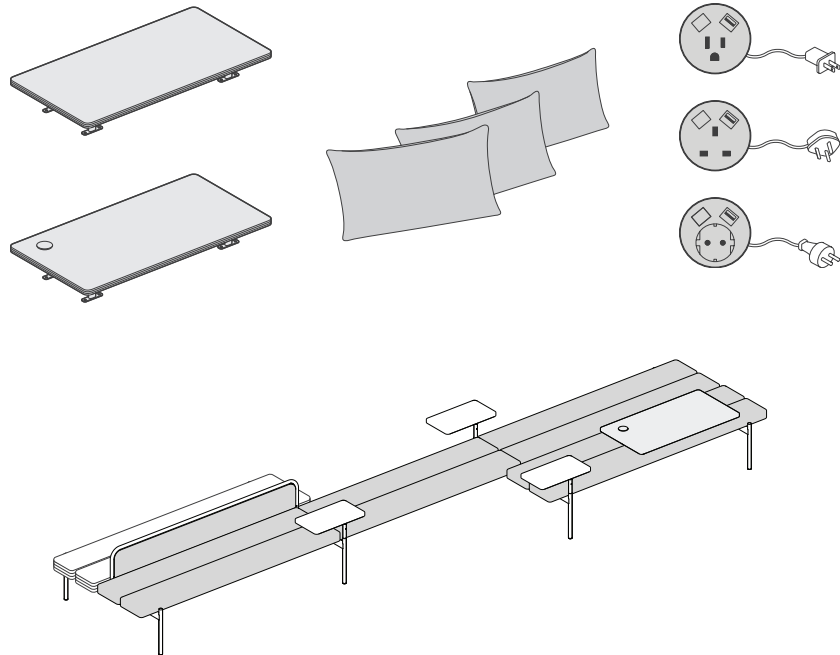

ISLAND

ISLAND

A versatile, space-optimising bench system with multiple configurations, giving in between residential and contract areas a collaborative, functional use.

A simple portfolio of configurations, colours, textiles and add-ons can be mixed and matched to create endless possibilities. External or internal partitions can act as back rests and various sized tables and integrated charging modules provide points of engagement. Additional accessories include multiple sized tables and cushions. Easy to dismantle and rebuild when cleaning, the units are hygienic and ideal for busy areas. With single or double depth options, it's easily scalable and expandable as communities grow.

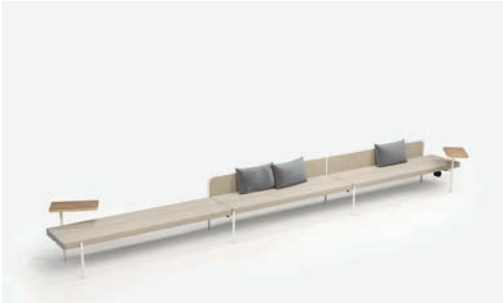

ISLAND SYSTEM

Made up of long modular units allowing several sizes and a variety of depths, supported by a aluminium frame and panels of CLT (Cross- Laminated Timber) and optional upholstered seating.
