# NEKTON

## Zaha Hadid

---

With the unmistakable flowing aesthetic of the late architect Zaha Hadid, the Nekton form splits into four distinct shapes to create a flexible system of sculptural seats. Grouped or scattered, the connected surface designs create a sense of continuity through any space.

### THE DESIGNER

Zaha Hadid was the first woman to be awarded the distinguished Pritzker Architecture Prize in 2004 and is internationally known for her built, theoretical and academic work. Her recognisable and remarkable style is characterized by fragmented geometry and bold fluid forms.

## CLEANING GUIDELINES

### SATIN-MATT POLYESTER

The table should first be dry dusted with a clean, cotton cloth. If wet cleaning is required, the item should be cleaned without pressure using a soft, slightly damp sponge using deionised water (Tap water contains salts that can leave a residue on the surface of the polyester.) with a mild, non-coloured detergent, such as Ecover Washing Up liquid. If this method is used, the table should be dried thoroughly using a foam sponge in order to avoid temporary streaking and residue. Do not use cotton cloths or other high lint materials at this point.

### HIGH-GLOSS

Same as above, however, it can be polished with a lint free cloth.

### MARKS AND STAINS

Use a slightly damp cloth with a mild detergent.

Avoid contact with certain solvents, including white spirit, toluene based products and acetone (Beware of many household cleaning products and polishes as these may contain potentially damaging solvents).
