DRYING CABINET
ESTERI FOHN 61

Unique air circulation system – dry and warm air is blown between textiles

ESTERI FOHN 61 is a drying cabinet with a heat-pump condensing system.

Gentle drying
Textiles which requires very gentle drying (for ex. Gore-tex, Thinsulate) can be dried in the cabinet because of mild drying temperature of heat-pump condensation.

Efficient drying
Short drying time is achieved by the unique air circulation system. The dry and warm air is blown between textiles from the back panel holes. Air is forced to go through the textiles, since it is sucked back to condensation unit from the bottom. Faster drying is achieved especially on drying textiles with special treatment (for ex. Gore-Tex) since dry air is blown inside the textile.

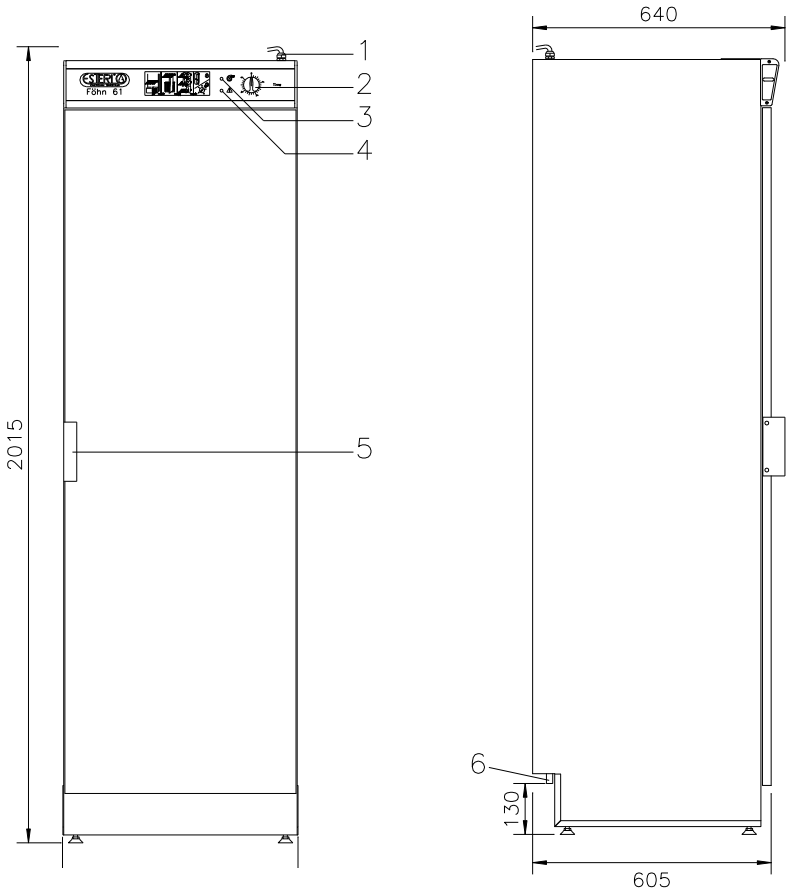

Multipurpose hangers
Cabinet has 18 double hanging rails. With larger textiles there will be be space between the hem. Both sides of the hanger can also be used for drying small textiles. Rails can be turned down when long textiles are dried. On door is 12 special hangers for gloves, socks etc.

Saves energy
Condensing unit is an energy saving heat-pump system and it recirculates the heat back to cabinet. Therefore the energy consumption is remarkable low.

Durable and safe
Cabinet is made of powder painted zinc-coated steel. Cabinet has child safe door locking mechanism, the door can also be opened from inside.
The heat-pump system is protected by CPS (compressor protection system) which cuts the power to compressor immedately if malfunction occures.

Easy to install and service
As standard the cabinet has a right hand door. The door can be easily be modified to left hand side.
The cabinet does not require any outlet piping or extra ventilation. Drain connection is on the back of the cabinet and the drain hose can be led to drain from both sides of the cabinet.
With a built-in condensation water tank (optional) the drain hose in not required.

DRYING CABINET
ESTERI FOHN 61

1. Electric connection
2. Timer 0-4 h
3. Signal lamp-operation
4. Signal lamp-CPS system
5. Door handle
6. Water drain connection

Modell		**FOHN 61**
Capacity	kg	4,0
Hanging lenght	m	18
Electrical connections - voltage - cable - fuse - total input	 mm² A kW	 1N 230 V 50 Hz 3 x 1,5 S 10 0,9
Drain connection - diameter - height - capacity	 mm mm l/min	 19 130 0,01
Dimensions - width - depht - height	 mm mm mm	 595 640 2015
Weight - net	 kg	 98
