

Campo magnético de correntes elétricas

Prof. Jadoski
Física

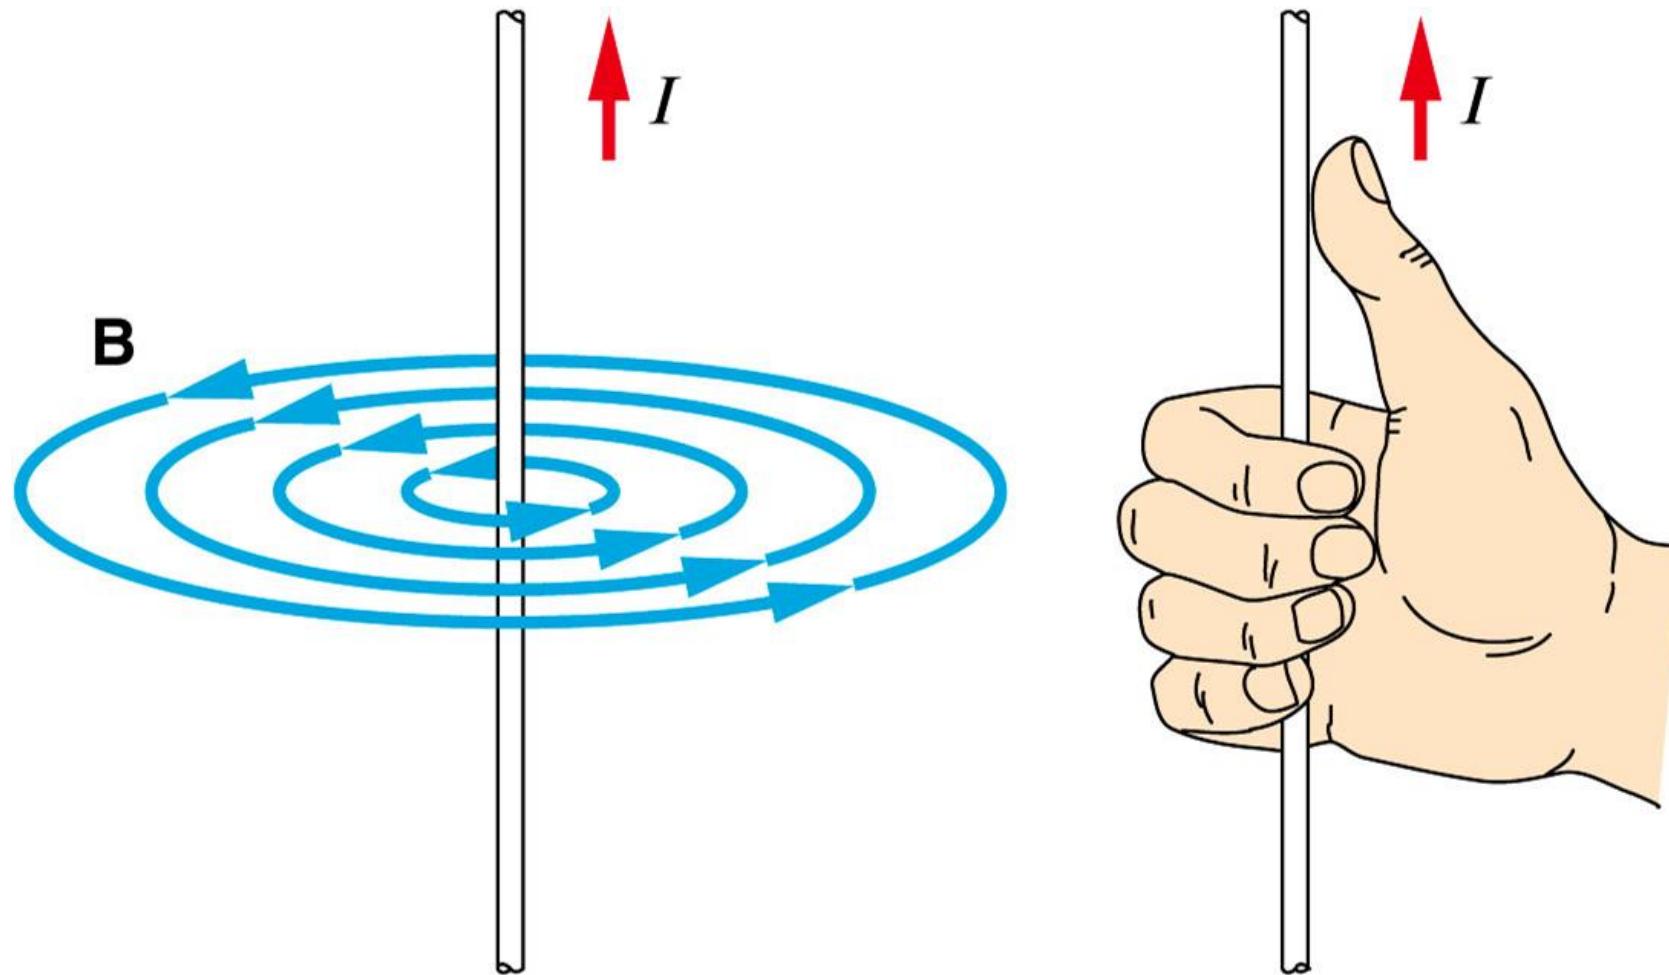

Propriedades magnéticas - campo

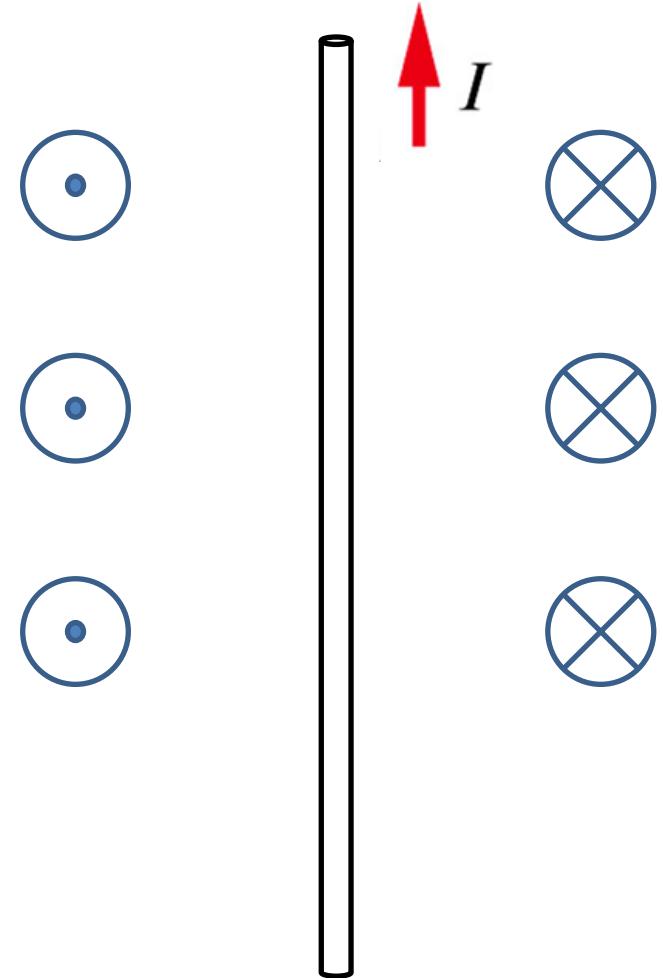

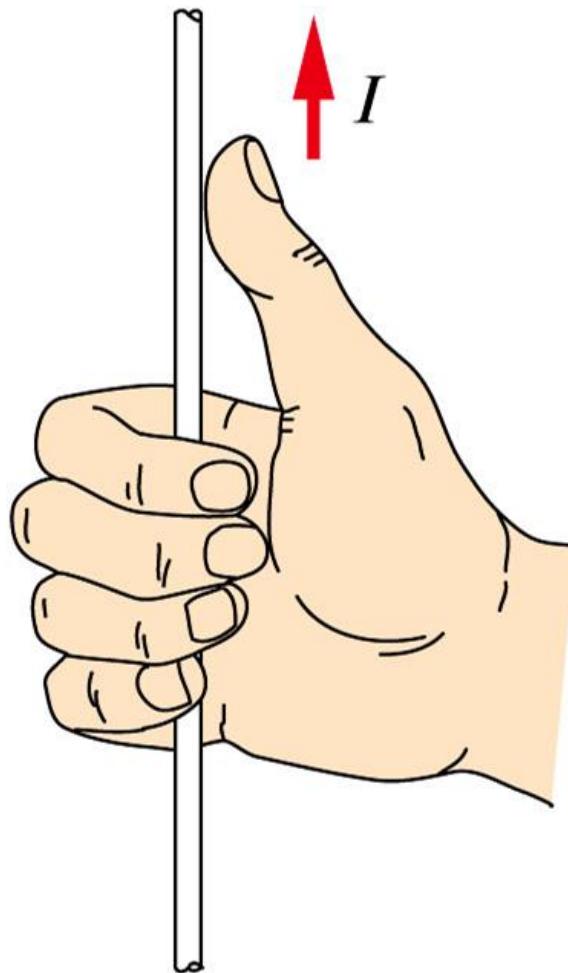

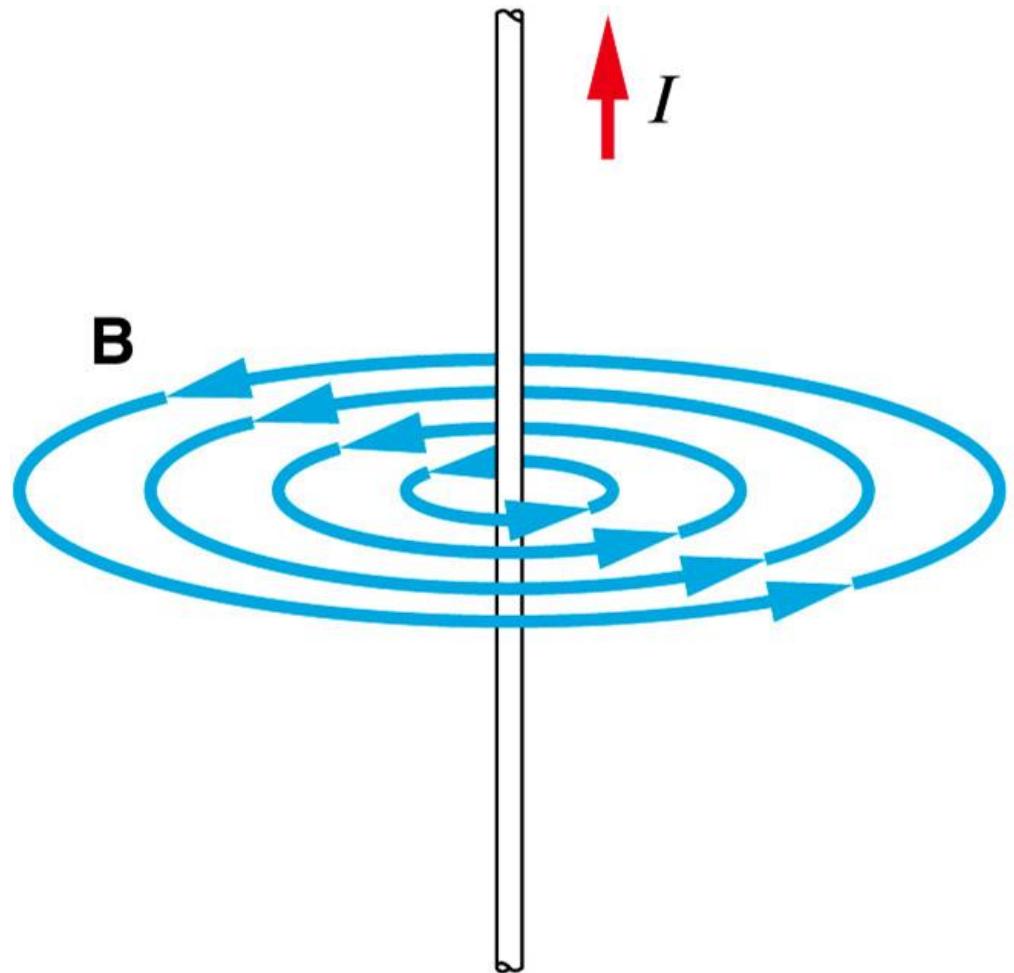

Experiência de Oersted

Campo magnético – fio retilíneo

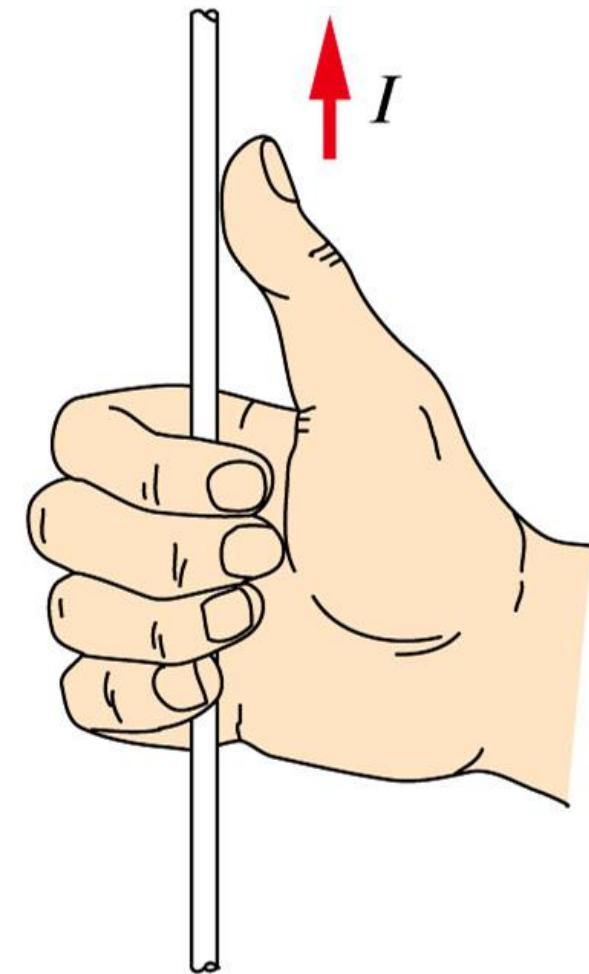

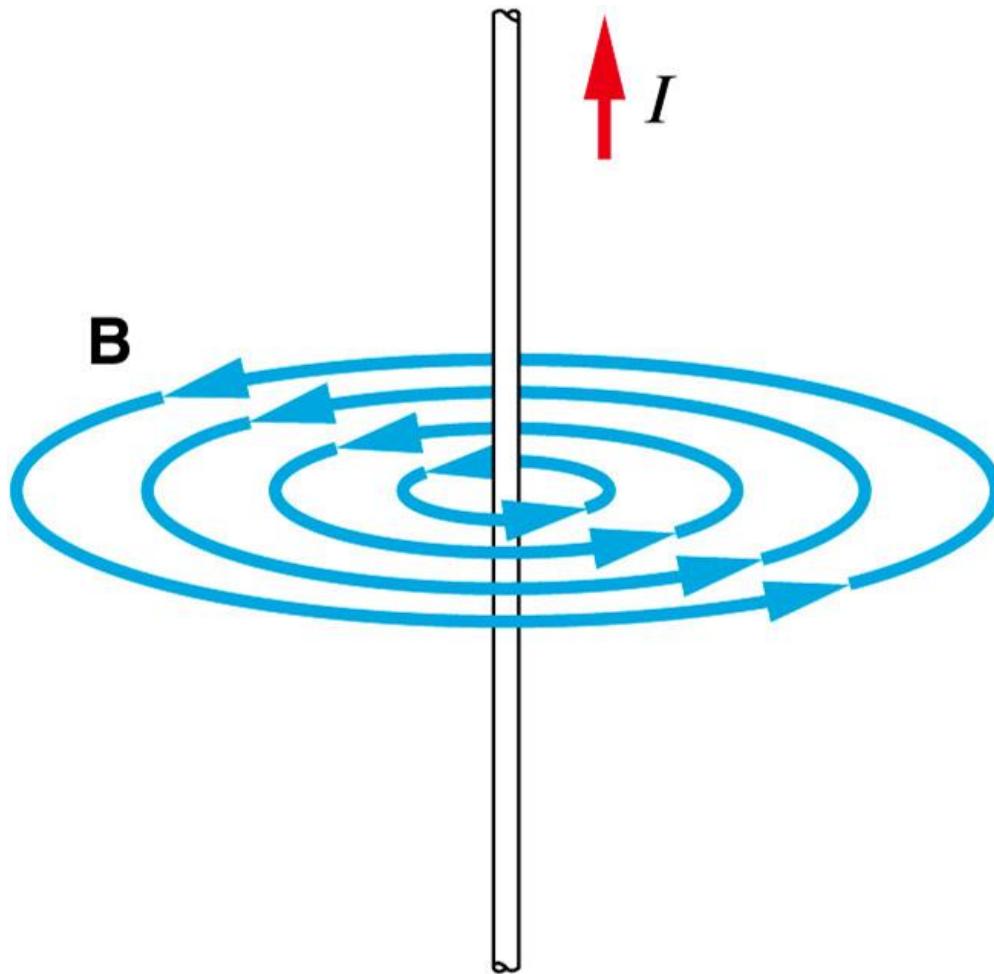

Campo magnético – fio retilíneo

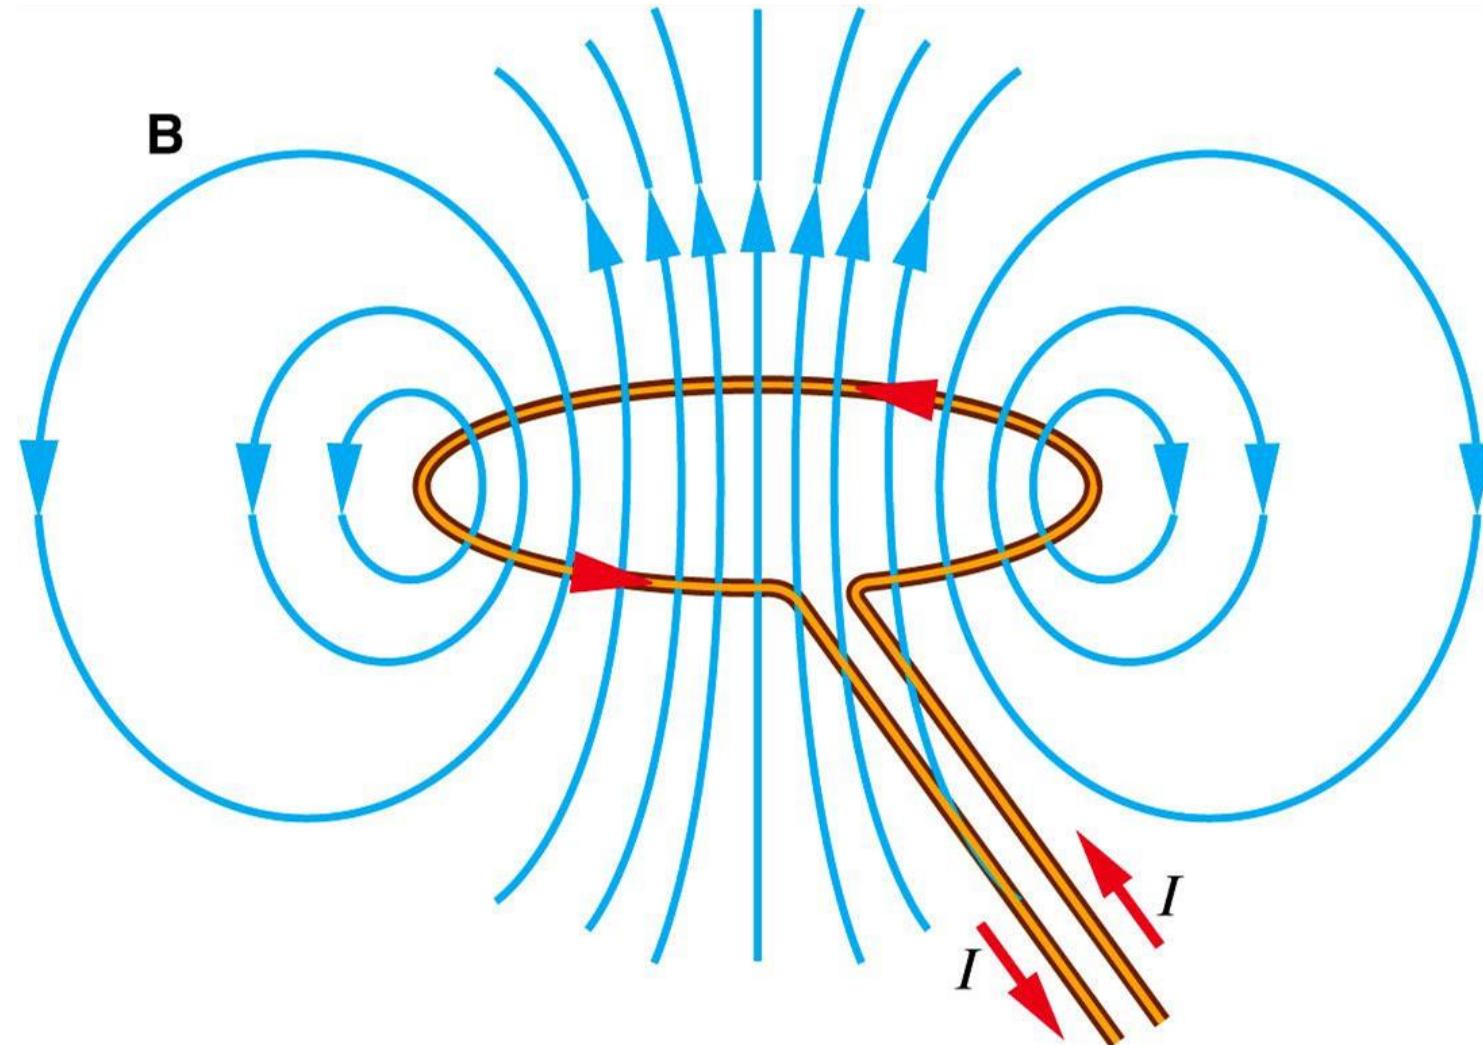

Campo magnético – fio retilíneo

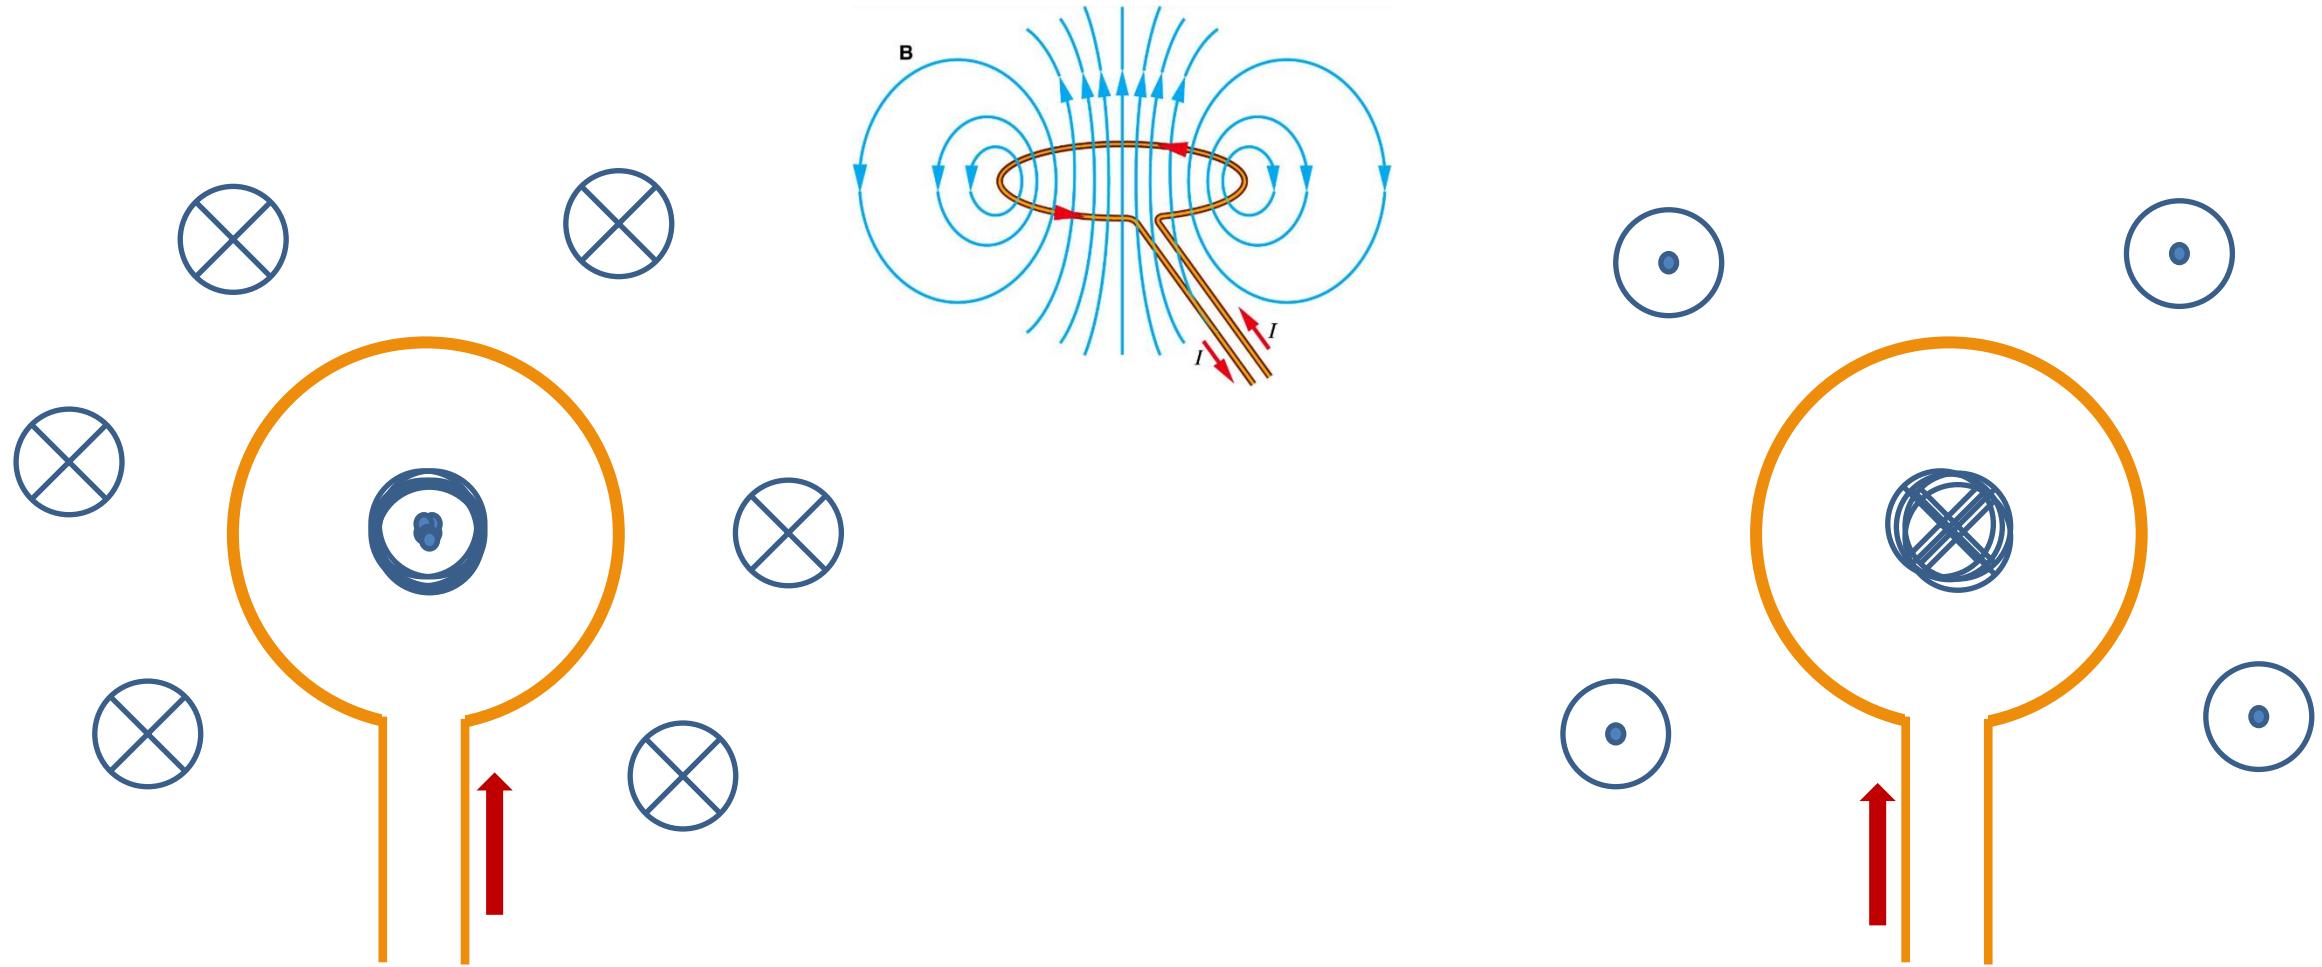

$$B = \frac{\mu \cdot i}{2 \cdot \pi \cdot d}$$

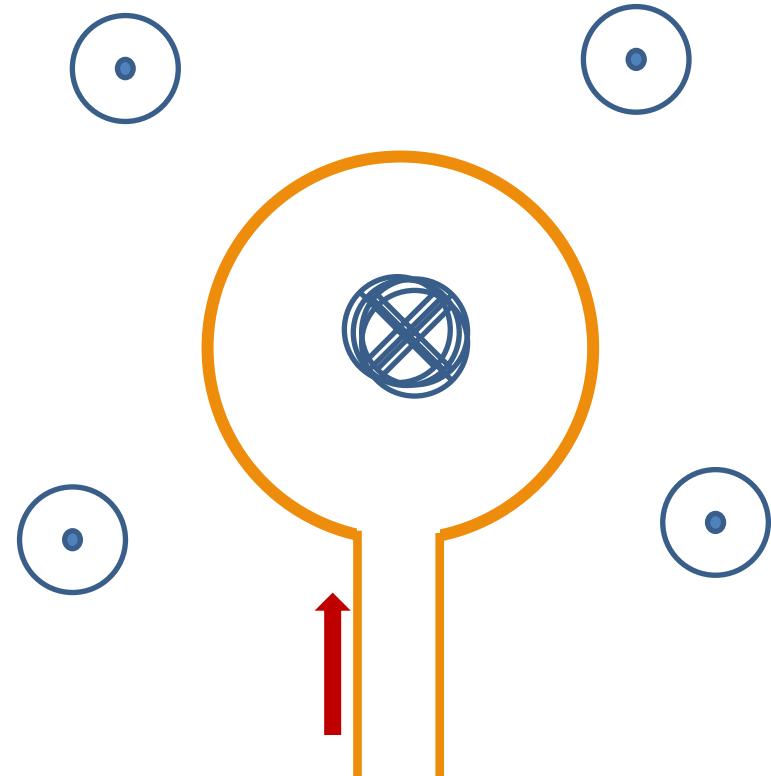

Campo magnético – espira

Campo magnético – espira

Campo magnético – espira

$$B = \frac{\mu \cdot i}{2 \cdot R}$$

Campo magnético – espira (dentro e fora)

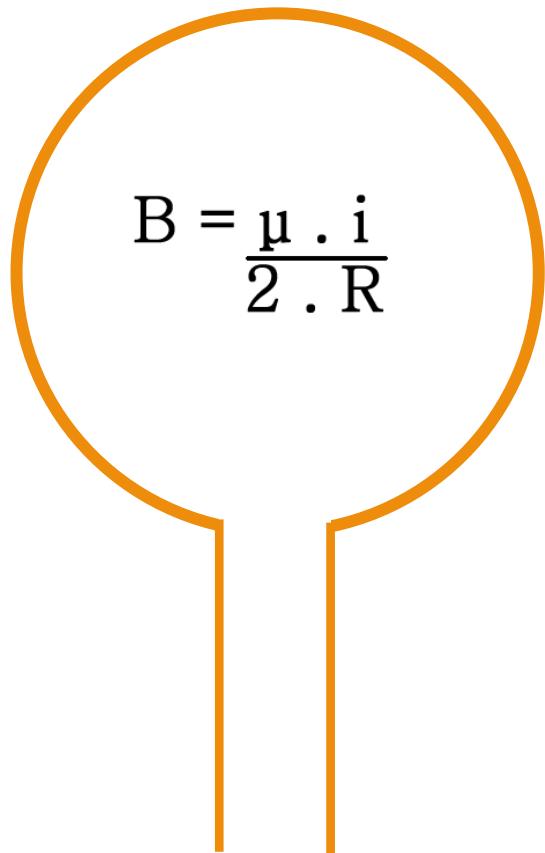

$$B = \frac{\mu \cdot i}{2\pi d}$$

$$B = \frac{\mu \cdot i}{2\pi d}$$

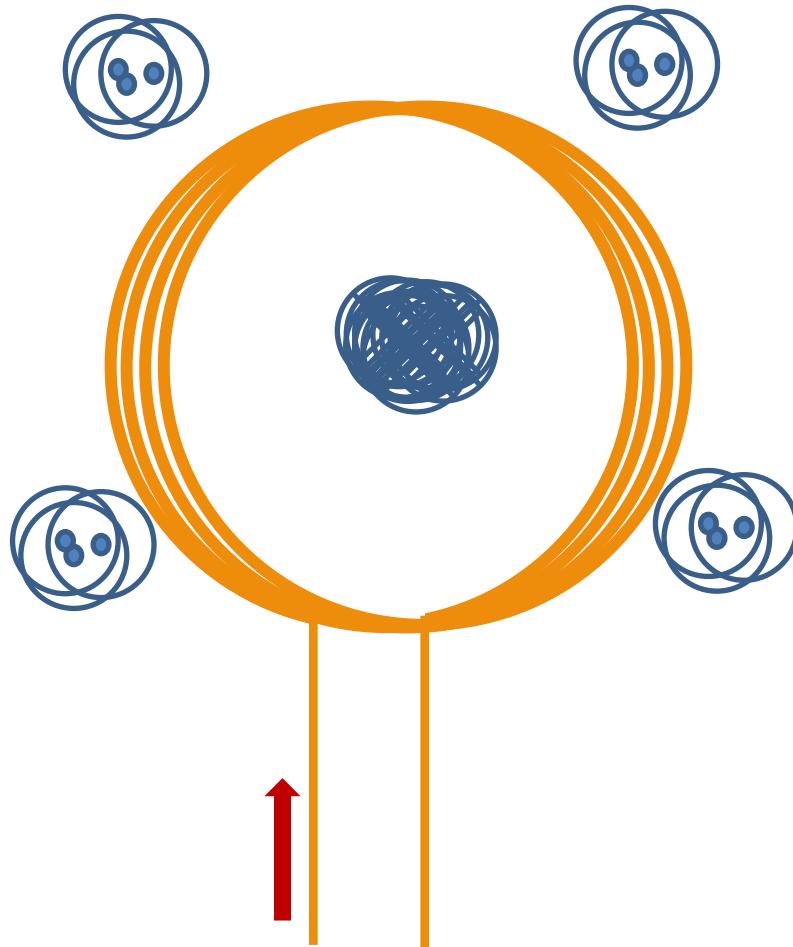

$$B = \frac{\mu \cdot i}{2\pi d}$$

$$B = \frac{\mu \cdot i}{2 \cdot R}$$

$$B = \frac{\mu \cdot i}{2\pi d}$$

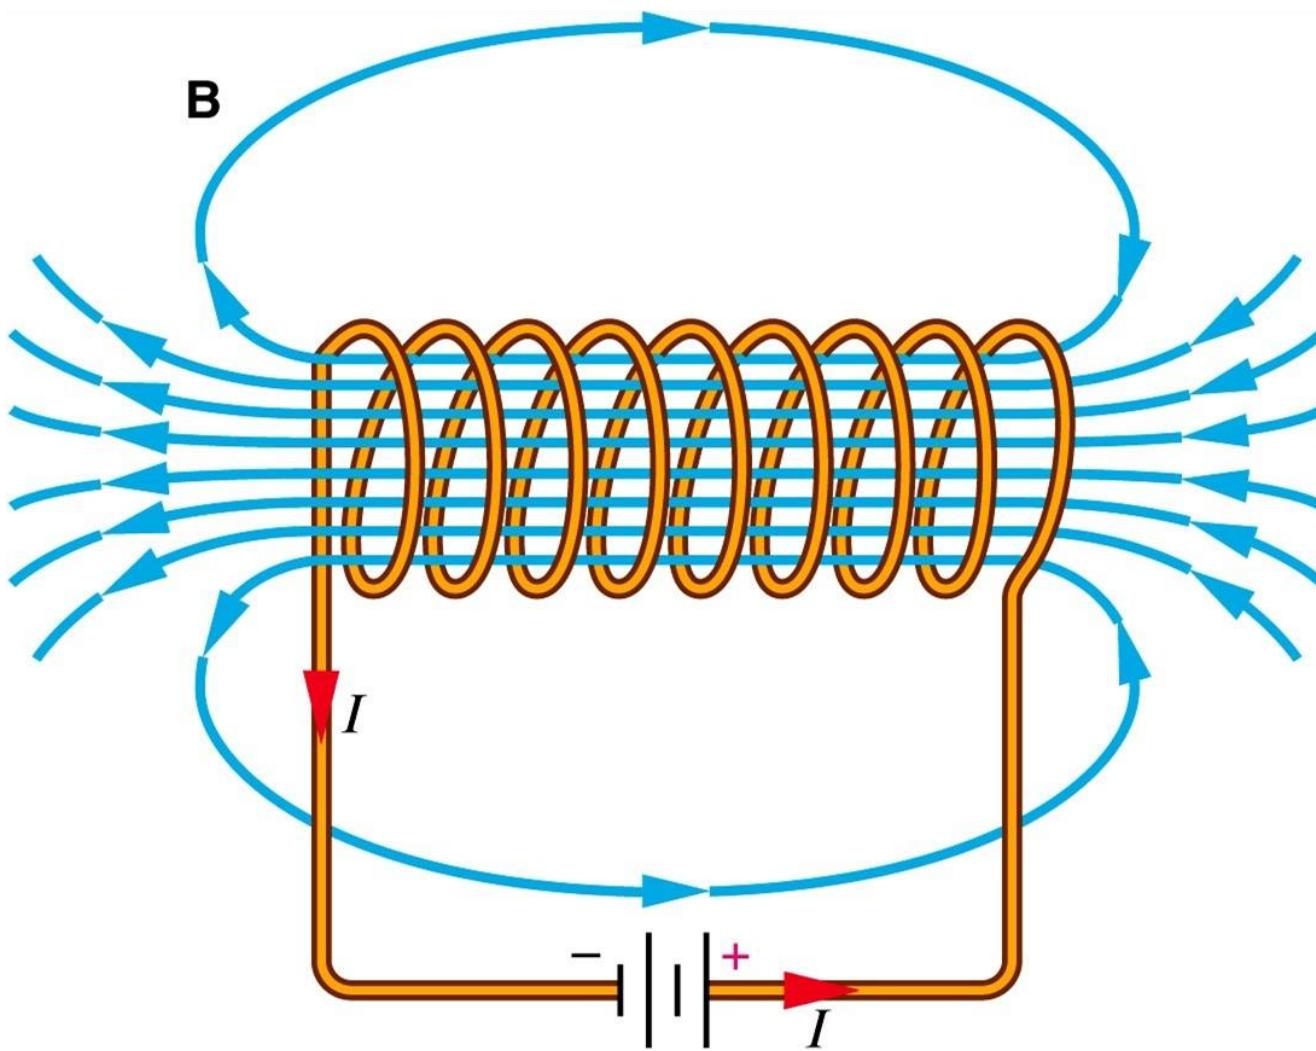

Campo magnético – n espiras

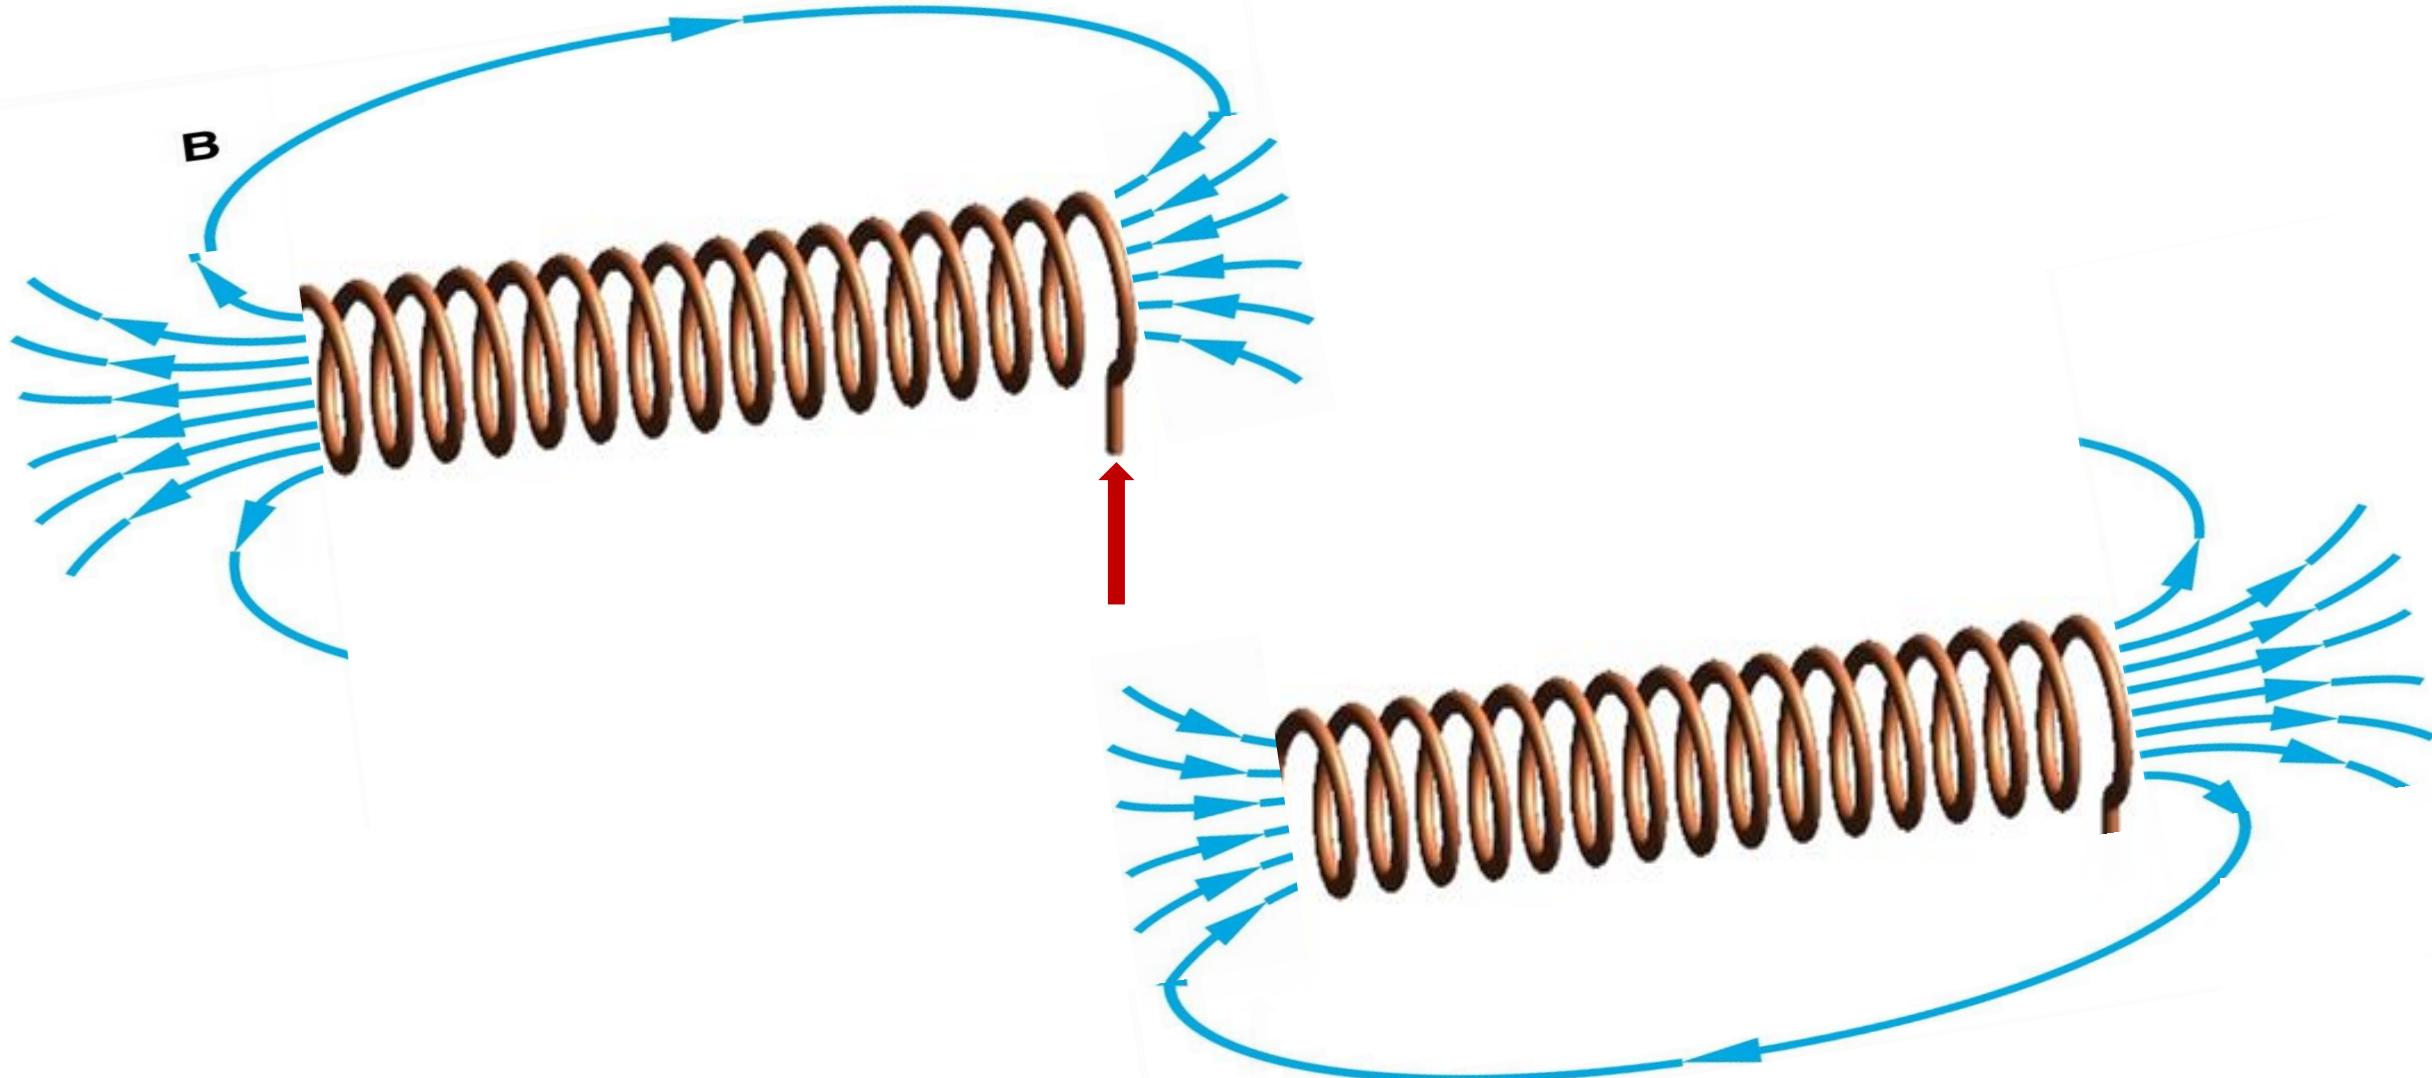

$$B = \frac{\mu \cdot i}{2 \cdot R} \times n$$

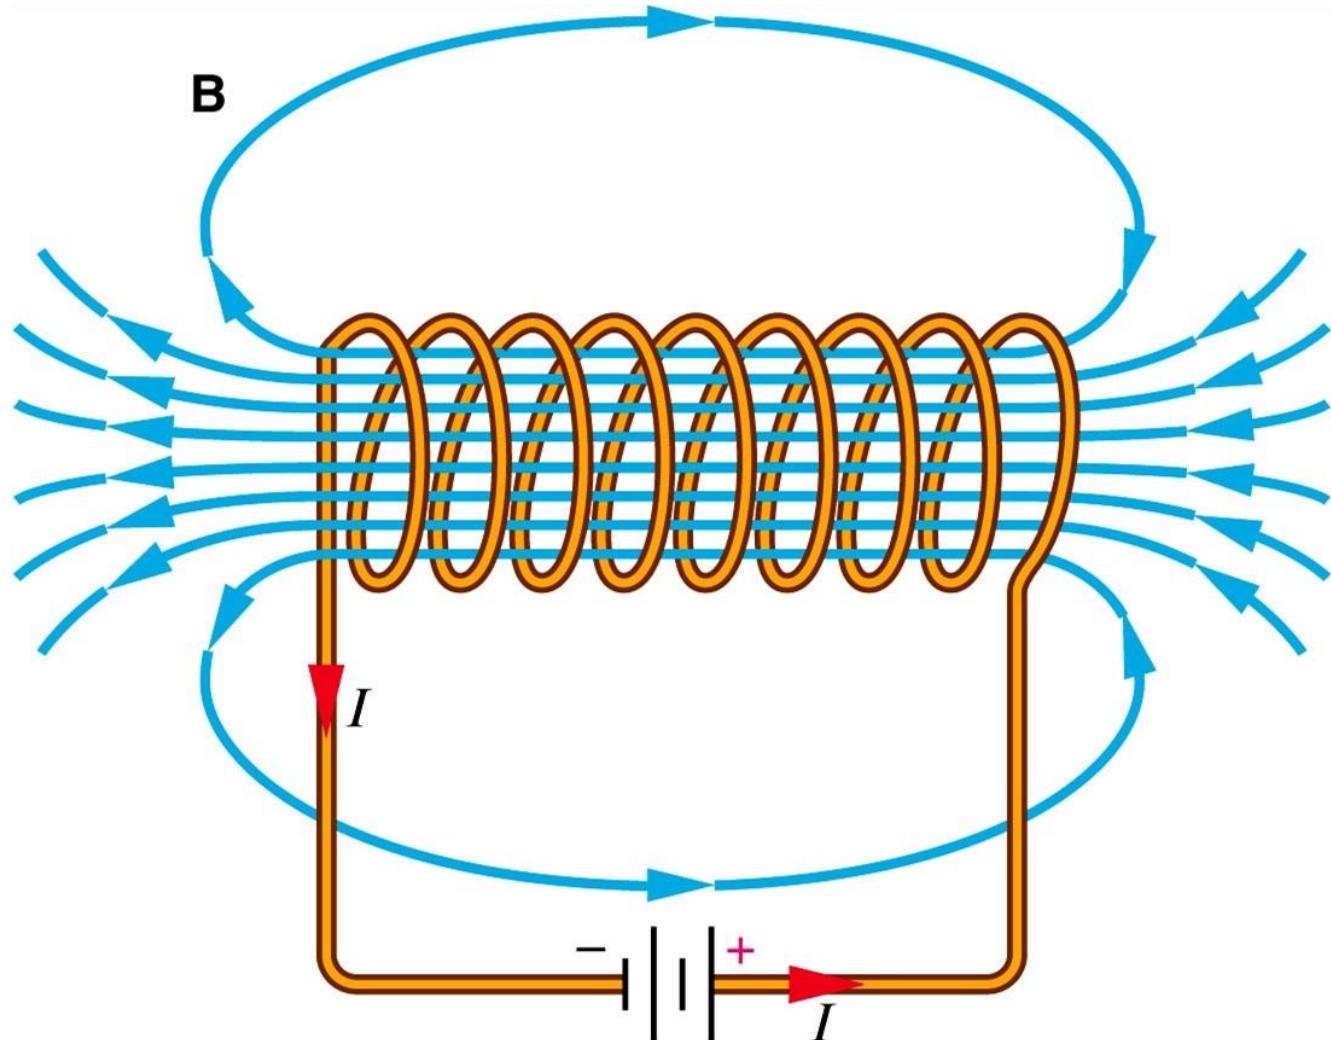

Campo magnético – solenóide

Campo magnético – solenóide

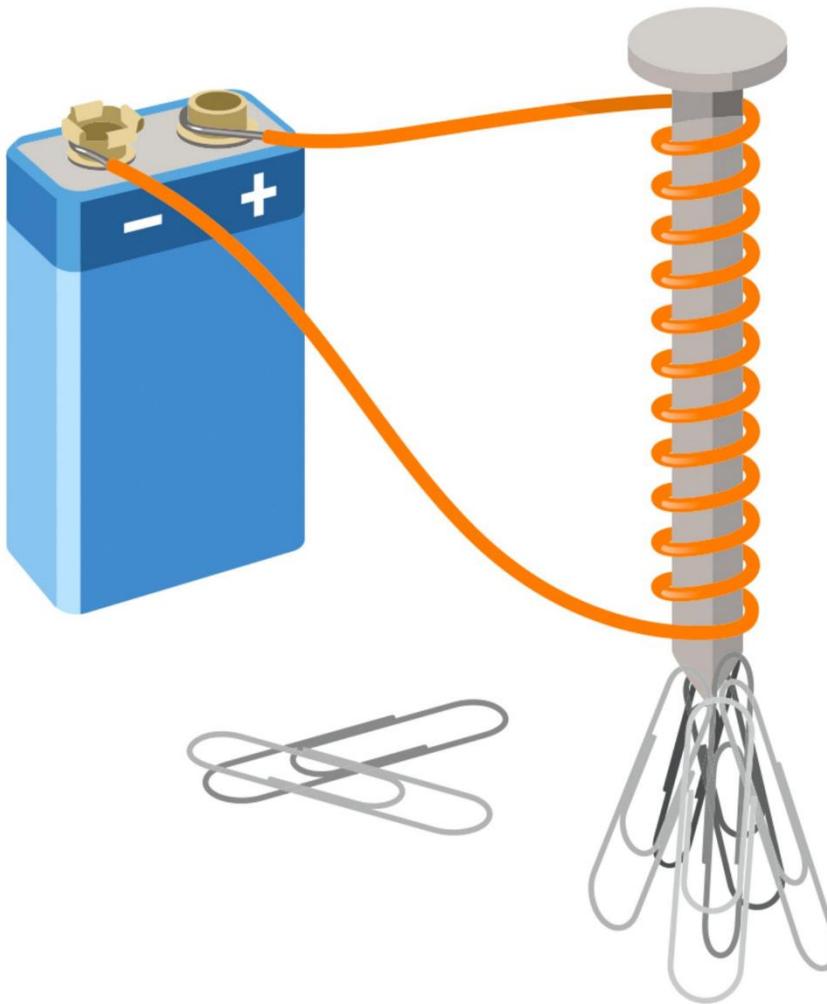

Campo magnético – solenóide

$$B = \frac{\mu \cdot i \cdot n}{l}$$

Campo magnético – solenóide (eletromagnétopo)

Campo magnético
